Keeping Standards up-to-date

Australian Standards are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves that they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about SDO Standards, drafts, amendments and new projects can be found by visiting www.frdc.com.au and www.seafoodstandards.com.au/
