This Australian Standard was prepared by Committee IT/3, Computer Related Graphics. It was approved on behalf of the Council of Standards Australia on 2 November 1988 and published on 13 October 1989.

The following interests are represented on Committee IT/3:

ACADS

Association of Consulting Engineers, Australia

Australian Vice Chancellors Committee

Department of Defence

Royal Australian Institute of Architects

Telecom Australia

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by Standards Australia's Committee on Computer Related Graphics. It is identical with and has been reproduced from International Standard ISO 9282-1:1988, *Information processing—Coded representation of pictures—Part 1: Encoding principles for picture representation in a 7-bit or 8-bit environment.*

For the purpose of this Australian Standard, the text of the ISO Standard should be modified as follows:

(a) *Terminology.* The words 'Australian Standard' should replace the words 'International Standard' wherever they appear.

(b) *References.* The references to International Standards should be replaced by references to Australian Standards as follows:

Reference to International Standard		*Australian Standard*	
ISO		AS	
646:1983	Information processing—ISO 7-bit coded character sets for information interchange	1776:1980	Information processing—7-bit coded character set for information interchange
2022:1986	Information processing—ISO 7-bit and 8-bit coded character sets—Code extension techniques	1953:1987	Information processing—ISO 7-bit and 8-bit coded character sets—Code extension techniques
6429:1983	Information processing—ISO 7-bit and 8-bit coded character sets—Additional control functions for character-imaging devices	2761:1985	Information processing—7-bit and 8-bit coded character sets—Additional control functions for character-imaging devices

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the Head Office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

	Page
1 Scope	4
2 Normative references	4
3 Definitions and notation	4
3.1 Definitions	4
3.2 Notation	4
3.2.1 7-bit byte	4
3.2.2 8-bit byte	5
3.2.3 Byte interpretation	5
3.3 Layout of the code table	5
3.3.1 7-bit representation	5
3.3.2 8-bit representation	5
4 Encoding principles	5
5 Encoding principles for opcodes	5
5.1 General	5
5.2 Compact opcode encoding	7
5.3 Extensible opcode encoding	7
5.3.1 Encoding technique of the basic opcode set	7
5.3.2 Extension mechanism	7
6 Encoding principles for operands	8
6.1 General	8
6.2 Format definitions	8
6.2.1 Basic format	8
6.2.2 Bitstream format	9
6.2.3 String format	9
6.3 General datatypes	10
6.3.1 Unsigned integers	10
6.3.1.1 Unsigned integers in the basic format	11
6.3.1.2 Unsigned integers in the bitstream format	11
6.3.2 Signed integers	11
6.3.2.1 Signed integers in the modulus-and-sign notation using the basic format	13
6.3.2.2 Signed integers in the two's complement notation using the basic format	14
6.3.2.3 Signed integers in the modulus-and-sign notation using the bitstream format	15
6.3.2.4 Signed integers in the two's complement notation using the bitstream format	16
6.3.3 Real numbers	16
6.3.3.1 Real numbers in the basic format	17
6.3.3.2 Real numbers in the bitstream format	20
6.3.4 Coordinates (2-dimensional)	23
6.3.4.1 Coordinates using real numbers	23
6.3.4.2 Coordinates interleaved coordinate pairs	23
6.3.5 Coordinates (3-dimensional)	23
6.3.5.1 Coordinates using real numbers	23
6.3.5.2 Coordinates interleaved coordinate triplets	24
6.3.6 Point lists in displacement mode	24
7 Conformity	25
Annex A: List and definition of state variables	26
