This Australian Standard® was prepared by IT-015, Software and Systems Engineering. It was approved on behalf of the Council of Standards Australia on 11 June 2019.

This Standard was published on 28 June 2019.

The following are represented on Committee IT-015:

Australian Computer Society
Australian Digital Health Agency
Australian Society for Technical Communication (NSW)
Department of Defence (Australian Government)
Engineers Australia
Griffith University
IT Service Management Forum Australia
NSW Business Chamber
Quantitative Enterprise Software Performance
Systems Engineering Society of Australia
University of New South Wales
University of Southern Queensland
University of Technology Sydney

This Standard was issued in draft form for comment as DR AS ISO/IEC 25066:2019.

Preface

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee IT-015, Software and Systems Engineering.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to describe the Common Industry Format (CIF) for reporting usability evaluations. It provides a classification of evaluation approaches and the specifications for the content items (content elements) to be included in an evaluation report based on the selected evaluation approach(es). The intended users of the usability evaluation reports are identified, as well as the situations in which the usability evaluation report can be applied.

This Standard is identical with, and has been reproduced from, ISO/IEC 25066:2016, *Systems and software engineering — Systems and software Quality Requirements and Evaluation (SQuaRE) — Common Industry Format (CIF) for Usability — Evaluation Report.*

As this document has been reproduced from an International Standard, the following applies:

(a) In the source text "this International Standard" should read "this Australian Standard".

(b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms "normative" and "informative" are used in Standards to define the application of the appendices or annexes to which they apply. A "normative" appendix or annex is an integral part of a Standard, whereas an "informative" appendix or annex is only for information and guidance.

Contents

Preface ii

Foreword iv

Introduction v

1 Scope 1

2 Conformance 1

3 Terms and definitions 1

4 Purpose and types of usability evaluations 6
- 4.1 Purpose of an evaluation 6
- 4.2 Types of usability evaluations 6
- 4.3 Assessing conformity of the object of evaluation against specified criteria 7

5 Content elements of usability evaluation reports 9
- 5.1 Selecting content elements 9
- 5.2 Description of the content elements for each type of evaluation 10
  - 5.2.1 Executive summary (if used) 10
  - 5.2.2 Description of the object of evaluation 10
  - 5.2.3 Purpose of the evaluation 11
  - 5.2.4 Method 12
  - 5.2.5 Procedure 18
  - 5.2.6 Results 23
  - 5.2.7 Interpretation of results and recommendations 25
  - 5.2.8 Additional content for conformity assessment (as part of a usability evaluation report) 26

Annex A (normative) **Overview on required and recommended content elements for each type of evaluation** 27

Annex B (informative) **Usability test report example** 30
