Preface

This Australian Handbook was prepared by the Standards Australia Committee EV-019, E-waste.

The objective of this Handbook is to provide best practice guidelines for facility and building managers to design and implement safe and environmentally sound aggregation and storage programs for occupants' discarded electrical and electronic equipment in order to facilitate efficient collection and maximize re-use, recovery and recycling.

This Handbook is intended to supplement and be read in conjunction with AS/NZS 5377:2013 *Collection, storage, transport and treatment of end-of-life electrical and electronic equipment.*
