Australian Standard™

LP Gas fuel systems for marine engines

This Australian Standard was prepared by Committee ME-046, Gas Fuel Systems for Vehicle Engines. It was approved on behalf of the Council of Standards Australia on 30 April 2002 and published on 10 May 2002.

The following interests are represented on Committee ME-046:

Australian Automobile Association

Australian Chamber of Commerce and Industry

The Australian Gas Association

Australian Industrial Truck Association

Australian Liquefied Petroleum Gas Association

Box Hill Institute of TAFE

Department of Administrative and Information Services, S.A.

Department of Mines and Energy, Qld

Department of Industries & Business, N.T.

Department of Industry, Science and Resources (Commonwealth)

Department of Transport, S.A.

Department of Urban Services, A.C.T.

Federal Chamber of Automotive Industries

Institution of Engineers, Australia

Motor Traders Association of N.S.W.

Motor Trades Association of Australia

Office of Energy, W.A.

TAFE, N.S.W.

Victoria Police

WorkPlace N.S.W.

Additional interest participating in the preparation of this Standard:

Waterways Authority, N.S.W.

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-046, Gas Fuel Systems for Vehicle Engines, to provide a Standard for the installation, inspection, testing, commissioning and certification of LP Gas fuel systems for marine engines.

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee ME-046. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

This Standard was based on AS/NZS 1425:1999, LP Gas fuel systems for vehicle engines and has been modified to meet the needs of marine engines.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.
