Page 5. Clause 1.10. AMDT No 2 APRIL 1979

Delete existing clause (retain 'AS Mark' symbol and number) and *substitute:*

1.10 MARKING. Each trough shall be permanently stamped or indelibly marked with the manufacturer's name or registered trademark. The nominal capacity of each receptacle shall be clearly marked on the package or carton.

NOTE: Warning is given that the presence of the Australian standard number AS 1229 on the laundry trough, its packaging or literature related thereto could be taken as a claim by the manufacturer that the laundry trough so marked complies in all respects with this standard.

Attention is particularly drawn, however, to the scheme for independent assurance of compliance with this standard provided by the AS Mark which is a registered certification trademark owned by the Standards Association of Australia. This is shown below enclosed in the words, 'Approved to Australian Standard 1229'.

This mark can be used only by manufacturers licensed under the certification mark scheme operated by the SAA, and only when accompanied by the number of the relevant Australian standard.

The presence of this mark on or in relation to a product is an assurance that the goods have been produced to comply with the requirements of the Australian standard under a system of supervision, control and testing applied during manufacture and including periodical inspections at the manufacturer's works in accordance with the certification mark scheme of the SAA.

Further particulars of the terms of licence may be obtained from the Director, Standards Association of Australia, 80 Arthur Street, North Sydney, N.S.W., 2060.
