This Australian Standard® was prepared by IT-015, Software and Systems Engineering. It was approved on behalf of the Council of Standards Australia on 11 June 2019.

This Standard was published on 28 June 2019.

The following are represented on Committee IT-015:

Australian Computer Society
Australian Digital Health Agency
Australian Society for Technical Communication (NSW)
Department of Defence (Australian Government)
Engineers Australia
Griffith University
IT Service Management Forum Australia
NSW Business Chamber
Quantitative Enterprise Software Performance
Systems Engineering Society of Australia
University of New South Wales
University of Southern Queensland
University of Technology Sydney

This Standard was issued in draft form for comment as DR AS ISO/IEC 25063:2019.

Preface

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee IT-015, Software and Systems Engineering.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to specify the contents of both high-level and detailed descriptions of context of use for an existing, intended, designed or implemented system, product or service.

The context of use description is applicable to software and hardware systems, products or services (excluding generic products, such as a display screen or keyboard). The description of the context of use is intended to be used as part of system-level documentation resulting from development processes such as those in ISO 9241-210 and ISO/IEC JTC 1/SC 7 process standards.

This Standard is identical with, and has been reproduced from, ISO/IEC 25063:2014, *Systems and software engineering — Systems and software product Quality Requirements and Evaluation (SQuaRE) — Common Industry Format (CIF) for usability: Context of use description.*

As this document has been reproduced from an International Standard, the following applies:

(a) In the source text “this International Standard” should read “this Australian Standard”.

(b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface ii
Foreword iv
Introduction v
1 Scope 1
2 Conformance 1
3 Terms and definitions 1
4 Purposes and types of context of use descriptions 4
4.1 General 4
4.2 Initial outline of the context of use 6
4.3 Detailed context of use descriptions 6
4.3.1 Current context of use 6
4.3.2 Intended context of use 6
4.3.3 Context of use specified as a part of user requirements 7
4.3.4 Context of use of the implemented system, product or service 7
4.3.5 Context of use of the deployed system, product or service 7
4.4 Context of use for an evaluation 7
4.5 Context of use information included in a product description 8
5 Elements of a context of use description 8
5.1 General 8
5.1.1 Overview of requirements and recommendations 8
5.1.2 Scope of the context of use 9
5.2 Subject of the context of use description 9
5.2.1 System, product or service and its purpose 9
5.2.2 Preconditions and constraints 10
5.3 User population 11
5.3.1 Users and other stakeholder groups 11
5.3.2 The characteristics of each user group 11
5.4 Goals and responsibilities of the user group and the organization 14
5.4.1 User group goals 14
5.4.2 Organizational goals and policies 14
5.4.3 Responsibilities 15
5.5 Tasks of the users 15
5.5.1 Task attributes 15
5.5.2 Task representations 16
5.6 Environment(s) of the user 16
5.6.1 General 16
5.6.2 Technical and technological environment 16
5.6.3 Social/organizational environment 17
5.6.4 Physical environment 17
5.7 Problems 18
5.7.1 General 18
5.7.2 Problems description 18
5.7.3 Deficiencies in effectiveness, efficiency or satisfaction 19
Annex A (informative) **Initial outline of the context of use** 21
Annex B (informative) **Users of the context of use** 22
Annex C (informative) **Example of a context of use checklist** 24
