Miscellaneous Publication

Certificated gas cylinder test stations

STANDARDS
Australia

This is a free page sample. Access the full version online.

This Miscellaneous Publication was prepared by Committee ME-002, Gas Cylinders. It was approved on behalf of the Council of Standards Australia on 31 March 2006.
This Miscellaneous Publication was published on 20 April 2006.

The following are represented on Committee ME-002:

Air Conditioning and Refrigeration Wholesalers Association
Australasian Institute of Engineer Surveyors
Australian Chamber of Commerce and Industry
Australian Liquefied Petroleum Gas Association
Certification Bodies (Australia)
Department for Administrative and Information Services, S.A.
Fire Protection Association of Australia
Institute of Materials Engineering Australasia Ltd
Pressure Equipment Association Incorporated
The Australian Gas Association
Victorian WorkCover Authority
Welding Technology Institute of Australia
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

The requirement to perform cylinder inspection and tests in a certificated test station was originated by Committee ME-002, Gas Cylinders, for use in accordance with AS 2030.1—1999, *The verification, filling, inspection, testing and maintenance of cylinders for the storage and transport of compressed gases,* Part 1: *Cylinders for compressed gases other than acetylene.*

This document lists gas cylinder testing stations. The stations listed have been issued with a certificate which shows the type of cylinder that they may test, and the names of personnel authorized to sign test reports. Such a certificate signifies that the personnel, equipment and procedures have been found to conform to the appropriate requirements as detailed in AS 2337 series of Standards. The certificate must be displayed in a prominent place at the test station. The test station mark listed against each certificated test station is that stamped on the cylinders after the tests specified in the AS 2337 series and AS 2030.1 have been satisfied.

When changes to certificated personnel of a test station are made, a new approval certificate is issued under the original number, and no alteration is made to this listing.

Each test station has undertaken to maintain all aspects of the test station in the as-certified state and, in particular, to advise certification bodies of any alterations to test facilities or changes of personnel.

Certification bodies are listed in column 2. The certification bodies are as follows:

SAIG SAI Global [Tel: (02) 8206 6060]

ISC International Standards Certification Pty Ltd [Tel: (02) 9894 6242]

AS 2337.2, *Gas cylinder test stations*, Part 2: *LP Gas fuel vessels for automotive use*, was issued in 1990 and specifies the requirements for test stations carrying out periodic inspections of these vessels.

AS 2337.3, *Gas cylinder test stations*, Part 3*: Inspection and testing of fibre reinforced plastics (FRP) gas cylinders*, was issued in 1998 and specifies the requirements for test stations carrying out periodic inspections of these vessels.

Future applications for any changes and/or signatory assessment are to be made to the certification body.
