AS 4067

Australian Standard™

Firefighters' helmets—Specification

Standards Australia

This is a free page sample. Access the full version online.

This Australian Standard was prepared by Committee SF-042, Helmets for Firefighters. It was approved on behalf of the Council of Standards Australia on 31 January 1994 and published on 11 April 1994.

The following are represented on Committee SF-042:

Australian Assembly of Fire Authorities
Australian Association of Rural Fire Authorities
Australian Chamber of Commerce and Industry
Australian Fire Protection Association
Department of Defence
Metal Trades Industry Association of Australia
National Occupational Health and Safety Commission
Occupational Health and Safety Authority Victoria
The Royal Australian Chemical Institute
United Firefighters Union of Australia
WorkCover Authority, N.S.W.

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee on Helmets for Firefighters to supersede AS 4067—1992.

This Standard incorporates Amendment No. 1 (July 2003). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

This Standard sets out performance requirements for materials, design and construction of helmets intended for use by firefighters. Helmets complying with this Standard are generally intended to be worn by persons involved in fighting structural fires in city and urban areas.

This Standard was revised with the objective of incorporating improvements based on user experience gained since it was first published in 1992. Revisions include the use of sample chinstraps in lieu of samples of materials used to manufacture the straps when testing these materials and the granting of approval for the testing laboratories to determine the ‘position index’ when this is not provided by the helmet manufacturer. Other revisions relate to testing procedures to clarify requirements and reduce ambiguities.

The term ‘normative’ has been used in this Standard to define the application of the appendices to which it applies. A ‘normative’ appendix is an integral part of a Standard.

CONTENTS

Page

SECTION 1 SCOPE AND GENERAL
1.1 SCOPE 5
1.2 APPLICATION 5
1.3 REFERENCED DOCUMENTS 5
1.4 DEFINITIONS 6

SECTION 2 MATERIALS OF CONSTRUCTION
2.1 SHELL MATERIAL 11
2.2 HARNESS AND RETENTION SYSTEM 11

SECTION 3 DESIGN AND CONSTRUCTION
3.1 GENERAL 12
3.2 SHELL 12
3.3 RETENTION SYSTEM 12
3.4 HARNESS 13
3.5 FACESHIELD 13
3.6 EAR AND NECK PROTECTION 13
3.7 HELMET ACCESSORIES 13

SECTION 4 PERFORMANCE REQUIREMENTS
4.1 ELECTRICAL INSULATION 14
4.2 FLAME PROPAGATION EXPOSURE 14
4.3 CONVECTIVE HEAT EXPOSURE 14
4.4 RADIANT HEAT EXPOSURE 14
4.5 IMPACT ENERGY ATTENUATION 14
4.6 PENETRATION RESISTANCE 15
4.7 RETENTION SYSTEM 15
4.8 FACESHIELDS 15
4.9 EASE OF IGNITION OF EAR AND NECK PROTECTORS 16
4.10 HORIZONTAL PERIPHERAL VISION 16

SECTION 5 PERFORMANCE TESTING
5.1 GENERAL 17
5.2 TEST SAMPLES 17
5.3 CONDITIONING 17

SECTION 6 MARKING
6.1 HELMET SHELLS 19
6.2 INFORMATIVE LABELLING 19
6.3 REPLACEMENT COMPONENTS MARKING 20

APPENDICES
A ELECTRICAL INSULATION TEST 21
B DETERMINATION OF FLAME PROPAGATION PROPERTIES OF HELMETS 23
C CONVECTIVE HEAT EXPOSURE TEST 26
D RADIANT HEAT EXPOSURE TEST 28
