AS 3611—1993
IEEE Std 610:12—1990

Australian Standard®

Glossary of software engineering terminology

[IEEE title: IEEE Standard Glossary of Software Engineering Terminology]

This is a free page sample. Access the full version online.

This Australian Standard was prepared by Committee IT/9, Information Systems—Vocabulary and Software. It was approved on behalf of the Council of Standards Australia on 24 May 1993 and published on 16 August 1993.

The following interests are represented on Committee IT/9:

AOTC

Attorney-Generals Department

AUSTEL

Australian Association of Chief Information Officers

Australian Bankers' Association

Australian Bureau of Statistics

Australian Chamber of Manufactures

Australian Computer Society

Australian Information Industry Association

Department of Defence

Department of Finance

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Standards Australia Committee on Information Systems—Vocabulary and Software. It is identical with and has been reproduced from IEEE Std 610.12, *IEEE Standard Glossary of Software Engineering Terminology.*

Appendix A has been added to the back of this Standard showing corrections made by IEEE to their original Standard. Marginal bars have been used to indicate where corrections have been made to the text.

This Standard is published in support of other Australian Standards relating to software engineering. The terminology used in this Glossary may not always be recognized as normal Australian usage. However due to the global application of computing, users would be familiar with the alternative expressions and be able to relate them to the Australian equivalent.

Under arrangements made between Standards Australia and the International Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this Standard are advised that because of its origin, terms, definitions, examples and notes are given in spelling preferred in the USA.

Copyright of the content of this Standard remains the property of IEEE. The copyright of this edition is vested in Standards Australia.

In the bibliography in Clause 4 of this Standard, the following IEEE Standards are published as Australian Standards.

Reference to International Standard or other Publication		*Australian Standard*	
IEEE/ANSI		AS	
610.1	IEEE Standard Glossary of Mathematics of Computing Terminology*	—	
610.5	IEEE Standard Glossary of Data Management Terminology*	—	
729	IEEE Standard Glossary of Software Engineering Terminology*	—	
828	IEEE Standard for Software Configuration Management Plans	4042	Software configuration management plans
829	IEEE Standard for Software Test Documentation	4006	Software test documentation
830	IEEE Guide for Software Requirements Specifications*	—	
983	IEEE Guide for Software Quality Assurance Planning*	—	
990	IEEE Recommended Practice for Ada as a Program Design Language	4007	Ada as a program design language

*Not published as an Australian Standard. However, copies of the IEEE documents are available from Standards Australia's National Sales Office.

1002	IEEE Standard Taxonomy for Software Engineering Standards*	—	
1008	IEEE Standard for Software Unit Testing*	—	
1084	IEEE Standard Glossary of Mathematics of Computing Terminology*	—	
1012	IEEE Standard for Software Verification and Validation Plans*	—	
1016	IEEE Recommended Practice for Software Design Descriptions	4008	Software design descriptions

*Not published as an Australian Standard. However, copies of the IEEE documents are available from Standards Australia's National Sales Office.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
