This Standard was prepared under a joint arrangement by Standards Australia and the Standards Association of New Zealand. It was approved for publication on behalf of the Council of Standards Australia on 15 July 1992 and on behalf of the Standards Council of New Zealand on 3 April 1992. It was published on 17 August 1992.

The following organizations are represented on the Committees responsible for this Standard:

Standards Australia Committee TE/3, Electromagnetic Interference
Association of Consulting Engineers, Australia
Australian and Overseas Telecommunications Corporation
Australian Broadcasting Corporation
Australian Telecommunications Authority
Confederation of Australian Industry
Consumer Electronics Suppliers Association
CSIRO—Division of Applied Physics
Department of Defence
Department of Transport and Communications
Electricity Supply Association of Australia
Federation of Australian Commercial Television Stations
Federation of Australian Radio Broadcasters
Institution of Radio and Electronics Engineers, Australia
National Standards Commission
Optus Communications
Public Transport Corporation (Melbourne)
Society of Automotive Engineers—Australasia
Testing interests
Wireless Institute of Australia

Standards Association of New Zealand
Ministry of Commerce, Communications Division

Review of Standards
To keep abreast of progress in industry, Australian and New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all publications of the Standards Association of New Zealand and Standards Australia will be found in the Catalogue of Publications of the respective organization; this information is supplemented in their monthly magazines, which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian and New Zealand Standards, addressed to the head office of the relevant organizations are welcomed. Notification of any inaccuracy or ambiguity found in either an Australian or New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in Australia in draft form for comment as DR 91270.

PREFACE

This Standard was prepared by the Standards Australia and Standards Association of New Zealand Committees on Electromagnetic Interference. It is identical with and has been reproduced from IEC/CISPR 20:1990, *Limits and methods of measurement of immunity characteristics of sound and television broadcast receivers and associated equipment* including Amendment 1 (1990), prepared by CISPR Sub-Committee E. It is issued as a joint Standard under the terms of the Memorandum of Understanding between Standards Australia and the Standards Association of New Zealand with the objective of reducing technical barriers to trade between the two nations.

Where Amendment 1 applies to the text it is indicated by a bar in the margin.

Under arrangements made between Standards Australia and the international Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian Standard are advised of the following:

(a) Copyright is vested in Standards Australia.

(b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purpose of this joint Standard, the references to IEC or CISPR Publications should be replaced by references to Australian and New Zealand Standards as follows:

Publication		*Australian/New Zealand Standard*	
CISPR		AS/NZS	
13	Limits and methods of measurement of radio interference characteristics of sound and television broadcast receivers and associated equipment	1053	Limits and methods of measurement of radio interference characteristics of sound and television broadcast receivers and associated equipment
16	CISPR specification for radio interference measuring apparatus and measurement methods	1052	CISPR specification for radio interference measuring apparatus and measurement methods
		Australian Standard	
IEC		AS	
50	International Electrotechnical Vocabulary	1852	International Electrotechnical Vocabulary
50(161)	Electromagnetic compatibility	—	
94	Magnetic tape sound recording and reproducing systems	—	
94–2	Part 2: Calibration tapes	—	
96	Radio-frequency cables	—	
96–1	Part 1: General requirements and measuring methods (including Amendment No. 1 (1988))	—	
98	Analogue audio disk records and reproducing equipment	1127.8	Analogue audio disk records and reproducing equipment
CCIR Recommendation			
471	Nomenclature and description of colour bar signals	—	
500	Methods for the subjective assessment of the quality of television pictures	—	

NOTE: Manufacturers making a statement of compliance with this Joint Standard on a product, packaging, or promotional material related to that product are advised to ensure that such compliance is capable of being verified.

CONTENTS

Clause	Page
1. Scope	4
2. Object	4
3. Definitions	4
4. Limits of immunity	5
4.1 External immunity	5
4.2 Internal immunity (Under consideration)	7
5. Methods of measurement	8
5.1 General	8
5.2 Measurement of the immunity to ambient electromagnetic fields in the frequency range 150 kHz to 150 MHz	10
5.3 Measurement of the immunity to ambient electromagnetic fields in the frequency range 150 MHz to 1 GHz	20
5.4 Measurement of the immunity to RF induced currents in the frequency range 150 kHz to 150 MHz	23
5.5 Measurement of the immunity to RF induced voltages in the frequency range 150 kHz to 150 MHz	26
5.6 Measurement of internal immunity (under consideration)	28
5.7 Measurement of the screening effectiveness (under consideration)	28
6. Interpretation of CISPR immunity limits	28
6.1 Significance of a CISPR limit	28
6.2 Compliance with limits on a statistical basis	28
ANNEX A — Calibration of the TEM device	30
ANNEX B — Coupling units and low-pass filter for the measurement of the immunity to RF currents in the frequency range 150 kHz to 150 MHz	31
ANNEX C — Guide to the testing of television receivers	35
Legend of figures 1 to 30	37
FIGURES	38
Amendment 1 (1990)	70

The New Zealand copyright of this document is the property of the Standards Council. No part of it may be reproduced by photocopying or by any other means without prior written permission of the Director of the Standards Association of New Zealand unless the circumstances are covered by the exemption sections (19 and 21) of the Copyright Act 1962.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
