Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Handbook was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee QR-008, Quality Systems, to supersede HB 90.1:2012, *The Small Business Handbook—Guide to ISO 9001:2008.*

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Handbook as an Australian Handbook rather than an Australian/New Zealand Handbook.

The objective of this Handbook is to provide small and medium enterprises (SMEs) with guidance on developing and implementing an effective quality management system based on ISO 9001:2015, *Quality management systems—Requirements*.

This Handbook is identical with, and has been reproduced from the ISO Handbook, *ISO 9001:2015 for Small Enterprises*: *What to do?*
