Australian/New Zealand Standard™

Fuel containers—Portable—Plastics and metal

Standards Australia

STANDARDS NEW ZEALAND Paerewa Aotearoa

This is a free page sample. Access the full version online.

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME-045, Fuel Tanks and Containers. It was approved on behalf of the Council of Standards Australia on 28 February 2001 and on behalf of the Council of Standards New Zealand on 9 March 2001. It was published on 29 March 2001.

The following interests are represented on Committee ME-045:

Australian Association of Certification Bodies
Australian Automobile Association
Australian Automotive Aftermarket Association
Australian Chamber of Commerce and Industry
Australian Institute of Petroleum
Can Makers Institute of Australia
Department of Defence (Australia)
Plastics and Chemicals Industries Association
Society of Automotive Engineers-Australasia
Victorian WorkCover Authority
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 00265.

PREFACE

This Standard was prepared by the Standards Australia/Standards New Zealand Committee ME-045, Fuel Tanks and Containers, to supersede AS/NZS 2906:1999. This revision of the Standard was balloted as Amendment No. 1 to AS/NZS 2906:1999.

The principal changes in this edition involve the following:

(a) Revised marking requirements.

(b) Revised test procedures.

(c) Revised requirements for the Department of Defence.

(d) The requirements to provide literature regarding fire test results is deleted.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.
