

AS 3007.3—2004
(Incorporating Amendment No. 1)

AS 3007.3—2004

Australian Standard™

**Electrical installations—Surface mines
and associated processing plant**

**Part 3: General requirements for
equipment and ancillaries**

This Australian Standard was prepared by Committee EL-023, Electrical Equipment in Coal Mines. It was approved on behalf of the Council of Standards Australia on 28 July 2004. This Standard was published on 30 August 2004.

The following are represented on Committee EL-023:

Alternative Technology Association
Australian Electrical and Electronic Manufacturers Association
Business Council for Sustainable Energy
Electrical Regulatory Authorities Council
Electrical Safety Organisation, New Zealand
Electricity Engineers Association, New Zealand
ElectroComms & Energy Utilities Industries Skills Council
Energy Efficiency & Conservation Authority of New Zealand
Energy Networks Association
Institution of Professional Engineers, New Zealand
Ministry of Economic Development, New Zealand
National Electrical and Communications Association
New Zealand Electrical Institute
Research Institute for Sustainable Energy
Sustainable Energy Authority, Victoria
University of New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 5420, Sydney, NSW 2001.

AS 3007.3—2004
(Incorporating Amendment No. 1)

Australian Standard™

**Electrical installations—Surface
mines and associated processing
plant**

**Part 3: General requirements for
equipment and ancillaries**

Originated as AS 3007.3—1982.
Second edition 1987.
Third edition 2004.
Reissued incorporating Amendment No.1 (May 2005).

PREFACE

This Standard was prepared by Standards Australia Committee EL-033, Electrical Installations for Outdoor Sites Under Heavy Conditions, to supersede AS 3007.3—1987 which was based on IEC 60621-3:1979, *Electrical installations for outdoor sites under heavy conditions (including open-cast mines and quarries)*, Part 3: *General requirements for equipment and ancillaries*, including Amendment 1 (1986).

This Standard incorporates Amendment No. 1 (May 2005). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

This Standard was produced from AS 3007.3—1987. Even though much of the technical content is sourced from IEC 60621-3, this Standard is not equivalent to IEC 60621-3. It has been updated to align with Standards Australia style including the following:

- (a) Numbering of all clauses.
- (b) The addition of lists of referenced Standards.
- (c) Updating of references to other Standards.

This Standard is Part Three of a series that includes the following:

AS

3007	Electrical installations—Surface mines and associated processing plant
3007.1	Part 1: Scope and definitions
3007.2	Part 2: General protection requirements
3007.3	Part 3: General requirements for equipment and ancillaries (this Standard)
3007.4	Part 4: Additional requirements for specific applications
3007.5	Part 5: Operating requirements

The object of the AS 3007 series is to specify requirements for the installation and operation of electrical apparatus and systems in open-cut mines, quarries, stockpiles and similar installations to provide for the safety of persons, livestock and property.

AS 3007.1 outlines the scope of the AS 3007 series and provides definitions for some of the terms used. AS 3007.2 specifies measures which are required for protection against electric shock in normal service from direct contact with live parts, for protection against electric shock from parts which may become live in the event of a fault (indirect contact), and for protection against the effects of overcurrent resulting from overload or short-circuit conditions. AS 3007.3 (this Standard) prescribes general requirements for equipment and ancillaries associated with the electrical installation. AS 3007.4 sets out the requirements which are specific to particular installations, together with exemptions from the general requirements of AS 3007.2 and 3, which apply for such installations. AS 3007.5 sets out the normal operating procedures which should be carried out to ensure the safety of personnel.

The AS 3007 series recognizes several types of power supply system and specifies the protective measures which are necessary for each system. Requirements for protection of persons from indirect contact are based on the concept of permissible voltage versus time limits, which take into account the pathophysiological effects of electric current passing through the human body, typical industry conditions, and the probability of persons being in contact with the plant.

The terms ‘normative’ and ‘informative’ are used to define the application of the appendix to which they apply. A normative appendix is an integral part of a standard, whereas an informative appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1	SCOPE AND REFERENCED DOCUMENTS
1.1	SCOPE 5
1.2	REFERENCED DOCUMENTS 5
SECTION 2	GENERAL REQUIREMENTS FOR ELECTRICAL COMPONENTS
2.1	INTRODUCTION 7
2.2	DESIGN AND SELECTION 7
2.3	RELEVANT STANDARDS 7
2.4	MATERIALS 7
2.5	PROTECTION 7
2.6	OPERATING CONDITIONS 8
2.7	SITE CONDITIONS 8
2.8	COMBUSTIBLE MATERIALS 8
2.9	EARTH TERMINAL 8
2.10	NOISE LIMITATIONS 8
SECTION 3	ROTATING MACHINES
3.1	MECHANICAL CONSTRUCTION 9
3.2	MECHANICAL PROTECTION 9
SECTION 4	TRANSFORMERS
4.1	CORE, COIL AND TANK BRACING 10
4.2	ENCLOSURES 10
4.3	DUST EXCLUSION 10
4.4	PROTECTION FROM FIRE 10
4.5	POLLUTION BY COOLING MEDIUM (COOLANT) 10
SECTION 5	STATIC CONVERTERS
5.1	OVERVOLTAGE LIMITATION 11
5.2	INTERFERENCE WITH COMMUNICATION AND CONTROL SYSTEMS 11
5.3	ELECTRICAL COUPLING 11
5.4	PROTECTION AGAINST INTERACTION BETWEEN EARTHING SYSTEMS... 11
5.5	FEEDBACK SUPERVISION 11
5.6	LIMITATION OF HARMONICS 11
SECTION 6	SWITCHING DEVICES
6.1	PREVENTION OF UNINTENTIONAL OPERATION 12
6.2	ISOLATORS 12
6.3	INTERRUPTING CAPABILITY 12
6.4	PERSONNEL PROTECTION 12
SECTION 7	CABLE SELECTION AND APPLICATION
7.1	PHASE CONDUCTORS 13
7.2	PROTECTIVE CONDUCTOR 13
7.3	ARMOURING AS PROTECTIVE CONDUCTOR 13
7.4	LIMITING TEMPERATURES UNDER SHORT CIRCUIT 13
7.5	PROTECTION AGAINST PARTIAL DISCHARGE 13
7.6	SEMICONDUCTING LAYERS 14
7.7	PROVISION OF SCREENS AND/OR ARMOURING FOR CABLES ABOVE 1000 V 14
