HB 31—2002

HB 31

Handbook

Handbook of building construction tolerances—Extracts from building products and structures Standards

Standards Australia

This is a free page sample. Access the full version online.

This Australian Standard was prepared by Committee BD-069, Accuracy in Building Construction. It was published on 18 April 2002.

The following interests are represented on Committee BD-069:

Concrete Masonry Association of Australia

Housing Industry Association

Institution of Professional Engineers, New Zealand

National Precast Concrete Association Australia

Association of Consulting Engineers Australia

RMIT University

University of New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Handbook was prepared by Standards Australia. Its purpose is to identify, for persons in the building design and construction industries, those Clauses in building Standards that relate to tolerances. Extracts from available Commentaries are also included. Clause numbers of the Commentaries correspond to those in the Standard to which they refer and are prefixed by the letter 'C'. It does not purport to be exhaustive in this respect and the full Standards should be referred to for cross-referenced Clauses not included herein.

The Standards from which these extracts have been taken are currently available editions at the time of publication of this Handbook. At some later time, those Standards may be revised or amended. Users of the Handbook should, therefore, check on the status of the original Standards before applying any of the extracts. Users should also consult original Standards that are cited but not included in these extracts.

Since this Handbook is intended for use by design and construction personnel, it is expected that the nominal sizes of components will be obtained by designers from manufacturer's catalogues and that they will be determined by constructors generally from the drawings. Thus nominal sizes or ranges of sizes are not included for components with tolerances quoted in this Handbook (unless the 'tolerance' Clauses are cross-referenced to the 'sizes' Clauses).

As it is not intended that this Handbook be used by fabricators, the tolerances on materials used for fabrication are not included unless those tolerances are likely to be evident in finished products.

TABLE OF CONTENTS

Standards	Title	Page
AS 4100	Steel structures	4
AS 4100 Supp 1	Steel structures—Commentary	14
AS 1397	Steel sheet and strip—Hot-dipped zinc-coated or aluminium zinc coated	20
AS 3610	Formwork for concrete	21
AS 3610 Supp 2	Formwork for concrete—Commentary	37
AS 2876	Concrete kerbs and channels (gutters) – Manually or machine placed	46
AS 3600	Concrete structures	47
AS 3600 Supp1	Concrete structures—Commentary	49
AS 2160	Contract for the supply and construction of a swimming pool	51
AS 2160.1	Contract for the supply and construction of a swimming pool—Concrete pool or spa	52
AS 3850.2	Tilt-up concrete and precast concrete elements for use in building—Guide to the design, casting and erection of tilt-up panels	53
AS/NZS 2908.1	Cellulose-cement products—Corrugated sheets	54
AS/NZS 2908.2	Cellulose-cement products—Flat sheets	55
AS 4455	Masonry units and segmental pavers	56
AS 3700	Masonry structures	58
AS 3700 Supp 1	Masonry structures—Commentary	61
AS 2796.1	Timber hardwood—Sawn and milled products—Product specification	62
AS/NZS 2208	Safety glazing materials in buildings	65
AS 2047	Windows in buildings—Selection and installation	69
