Date of Issuance: November 30, 2007

The next edition of this Code is scheduled for publication in 2009. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. The interpretations will be included with this edition. Interpretations are published on the ASME Web site under the Committee Pages at http://cstools.asme.org as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Foreword vii
Committee Roster ix
Introduction xii
Summary of Changes xiv

General Provisions and Definitions
801 General 1
802 Scope and Intent 1
803 Piping Systems Definitions 2
804 Piping Systems Component Definitions 4
805 Design, Fabrication, Operation, and Testing Terms 6
807 Quality Assurance 7

Chapter I Materials and Equipment
810 Materials and Equipment 8
811 Qualification of Materials and Equipment 8
812 Materials for Use in Cold Climates 9
813 Marking 9
814 Material Specifications 9
815 Equipment Specifications 9
816 Transportation of Line Pipe 9
817 Conditions for the Reuse of Pipe 10

Chapter II Welding
820 Welding 12
821 General 12
822 Preparation for Welding 12
823 Qualification of Procedures and Welders 12
824 Preheating 13
825 Stress Relieving 13
826 Inspection of Welds 14
827 Repair or Removal of Defective Welds in Piping Intended to Operate at Hoop Stress Levels of 20% or More of the Specified Minimum Yield Strength 15

Chapter III Piping System Components and Fabrication Details
830 Piping System Components and Fabrication Details 16
831 Piping System Components 16
832 Expansion and Flexibility 22
833 Design for Longitudinal Stress 23
834 Supports and Anchorage for Exposed Piping 26
835 Anchorage for Buried Piping 26

Tables
831.42 Reinforcement of Welded Branch Connections, Special Requirements 21
832.2 Thermal Expansion of Carbon and Low Alloy Steel 23
832.5 Modulus of Elasticity for Carbon and Low Alloy Steel 23

Chapter IV Design, Installation, and Testing
840 Design, Installation, and Testing 28
841 Steel Pipe 30
842 Other Materials 41
843 Compressor Stations 48

844	Pipe-Type and Bottle-Type Holders	51
845	Control and Limiting of Gas Pressure	52
846	Valves	59
847	Vaults	60
848	Customers' Meters and Regulators	61
849	Gas Service Lines	62
Tables		
841.114A	Basic Design Factor, *F*	32
841.114B	Design Factors for Steel Pipe Construction	32
841.115A	Longitudinal Joint Factor, *E*	33
841.116A	Temperature Derating Factor, *T*, for Steel Pipe	33
841.322(f)	Test Requirements for Pipelines and Mains to Operate at Hoop Stresses of 30% or More of the Specified Minimum Yield Strength of the Pipe	40
841.33	Maximum Hoop Stress Permissible During Test	41
842.214	Standard Thickness Selection Table for Ductile Iron Pipe	43
842.32(c)	Wall Thickness and Standard Dimension Ratio for Thermoplastic Pipe	44
842.33(c)	Diameter and Wall Thickness for Reinforced Thermosetting Plastic Pipe	44
842.396(c)	Nominal Values for Coefficients of Thermal Expansion of Thermoplastic Pipe Materials	46
Chapter V	**Operating and Maintenance Procedures**	
850	Operating and Maintenance Procedures Affecting the Safety of Gas Transmission and Distribution Facilities	66
851	Pipeline Maintenance	68
852	Distribution Piping Maintenance	73
853	Miscellaneous Facilities Maintenance	76
854	Location Class and Changes in Number of Buildings Intended for Human Occupancy	78
855	Concentrations of People in Location Classes 1 and 2	80
856	Pipeline Service Conversions	80
Table		
854.1(c)	Location Class	79
Chapter VI	**Corrosion Control**	
860	Corrosion Control	82
861	Scope	82
862	External Corrosion Control	82
863	Internal Corrosion Control	85
864	Pipelines in Arctic Environments	87
865	Pipelines in High-Temperature Service	88
866	Stress Corrosion and Other Phenomena	88
867	Records	89
Chapter VII	**Miscellaneous**	
870	Miscellaneous	90
871	Odorization	90
872	Liquefied Petroleum Gas (LPG) Systems	90
873	Pipelines on Private Rights-of-Way of Electric Transmission Lines	91
Chapter VIII	**Offshore Gas Transmission**	
A800	Offshore Gas Transmission	92
A801	General	92
A802	Scope and Intent	92
A803	Offshore Gas Transmission Definitions	92
A811	Qualification of Materials and Equipment	93
A814	Material Specifications	93
