Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4628/1 was developed by Technical Committee ISO/TC 35, *Paints and varnishes*.

This International Standard results from the division into separate parts of International Standard ISO 4628/1-1978, which had been approved by the member bodies of the following countries :

Australia	India	Romania
Austria	Iran	South Africa, Rep. of
Brazil	Italy	Sweden
Canada	Korea, Rep. of	Switzerland
Chile	Mexico	Turkey
Czechoslovakia	Netherlands	United Kingdom
France	New Zealand	Yugoslavia
Germany, F. R.	Portugal	

No member body had expressed disapproval of the document.

This International Standard cancels and replaces section one of International Standard ISO 4628/1-1978.
