Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 2632.2.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-019, Information and Documentation, Information Technology—Learning, Educations, Training and Research, to supersede, AS/NZS 2632.2:1999.

The objective of this Standard is to establish a universally applicable code for the representation of the names of principal administrative divisions of countries and territories included in AS/NZS 2632.1. It is intended to be used in conjunction with AS/NZS 2632.1, *Codes for the representation of names of countries and their subdivisions*, Part 1: *Country codes*.

This Standard is identical with, and has been reproduced from, ISO 3166-2:2007 *Codes for the representation of names of countries and their subdivisions*, Part 2: *Country subdivision code*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this part of ISO 3166’ should read ‘this part of AS/NZS 2632’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>	
ISO		AS/NZS	
3166	Codes for the representation of names of countries and their subdivisions	2632	Codes for the representation of names of countries and their subdivisions
3166-1: Part 1: Country codes		2632.1	Part 1: Country codes

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Principles for inclusion in the list of country subdivision names	2
4.1	List and its sources	2
