Preface

This Standard was prepared by the Standards Australia Committee MB-025, Security and Resilience, to supersede AS ISO 22313:2017, *Societal security — Business continuity management systems — Guidance*.

The objective of this document is to give guidance and recommendations for applying the requirements of the business continuity management system (BCMS) given in AS ISO 22301. The guidance and recommendations are based on good international practice.

This document is applicable to organizations that —

- (a) implement, maintain and improve a BCMS;
- (b) seek to ensure conformity with the stated business continuity policy;
- (c) need to be able to continue to deliver products and services at an acceptable predefined capacity during a disruption; and
- (d) seek to enhance their resilience through the effective application of the BCMS.

The guidance and recommendations are applicable to all sizes and types of organizations, including large, medium and small organizations operating in industrial, commercial, public and not-for-profit sectors. The approach adopted depends on the organization's operating environment and complexity.

This document is identical with, and has been reproduced from, ISO 22313:2020, *Security and resilience — Business continuity management systems — Guidance on the use of ISO 22301*.

As this document has been reproduced from an International Standard, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

Contents

| | |
|--|-----------|
| Preface | ii |
| Foreword | v |
| Introduction | vi |
