EUROPEAN STANDARD

NORME EUROPÉENNE

EUROPÄISCHE NORM

EN 1474-3

December 2008

ICS 75.200

English Version

Installation and equipment for liquefied natural gas - Design and testing of marine transfer systems - Part 3: Offshore transfer systems

Installations et équipements de gaz naturel liquéfié - Conception et essais des systèmes de transfert marins - Partie 3: Systèmes de transfert offshore

Anlagen und Ausrüstung für Flüssigerdgas - Auslegung und Prüfung von Schiffsübergabesystemen - Teil 3: Offshore-Übergabesysteme

This European Standard was approved by CEN on 1 November 2008.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Definition and ability of the LNG transfer systems 7
4.1 System requirement 7
4.2 Overall safety philosophy 7
4.3 Overall functional targets and requirements 8
4.4 Design principles and risk assessment methodology 8
4.5 Design principles 9
4.6 Risk assessment 10
4.6.1 Hazard identification 10
4.6.2 Risk analysis 11
4.6.3 Risk assessment 11
4.6.4 Acceptance criteria 12
4.7 Safety-critical elements 12
4.8 Performance standards 12
4.9 Risk reduction 12

5 New design qualification 13
5.1 Design qualification 13
5.2 Technology assessment 14
5.3 Risk assessment: failure mode identification 14
5.4 Analysis and testing 14
5.5 Reliability analysis 16
5.6 Compliance statements 16

6 Design basis and criteria of a LNG transfer system 16
6.1 General 16
6.2 Supporting structures and equipment 17
6.3 Transfer line diameter and product data 17
6.4 Dimensions and clearances 17
6.5 Stress analysis 18
6.6 Dynamic behaviour (cyclic motions amplitude, speed and fatigue) 18
6.7 Special loads situations 18
6.8 Product swivel joints and structural bearings 19
6.9 Connecting/disconnecting device 19
6.10 Handling for connection, disconnection, storing 19
6.11 Communications, evacuation and rescue 19
6.12 Others 20

7 Safety precautions 21
7.1 Introduction 21
7.2 Communication 21
7.3 Approach and control monitoring berthing and connection process 21
7.4 Position monitoring, alarm and shut down system for the LNG transfer systems 22
7.5 ERS system 22
7.6 Safety interfaces 22
7.7 Control of fluid transfer 23

8 Connection with the LNGC 23
8.1 Two main categories of LNG transfer systems are anticipated: 23

8.2 Additional requirements for the ship shall address: 23
8.3 In order maximise the level of standardisation the following guidance shall be observed: 24
8.4 Systems and equipment for the position control of the LNG carrier during berthing, connection and transfer: 24

9 Operating and control design 24

10 Inspection and tests 24

11 Quality assurance and control 24

12 Documentation 24

Annex A (normative) **Procedure for deviation from the full standard 26**

Bibliography 27

Foreword

This document (EN 1474-3:2008) has been prepared by Technical Committee CEN/TC 282 “Installation and equipment for LNG”, the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2009, and conflicting national standards shall be withdrawn at the latest by June 2009.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This European Standard consists in 3 parts:

EN 1474-1: *Installation and equipment for liquefied natural gas — Design and testing of marine transfer systems — Part 1: Design and testing of transfer arms*

EN 1474-2: *Installation and equipment for liquefied natural gas — Design and testing of marine transfer systems — Part 2: Design and testing of transfer hoses*

EN 1474-3, *Installation and equipment for liquefied natural gas — Design and testing of marine transfer systems — Part 3: Offshore transfer systems*

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
