Australian/New Zealand Standard™

## **Explosive atmospheres**

### **Part 30.1: Electrical resistance trace heating—General and testing requirements**

### **AS/NZS 60079.30.1:2007**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-014, Equipment for Explosive Atmospheres. It was approved on behalf of the Council of Standards Australia on 19 February 2007 and on behalf of the Council of Standards New Zealand on 6 April 2007.  
This Standard was published on 26 April 2007.

---

The following are represented on Committee EL-014:

Association of Consulting Engineers Australia  
Auckland Regional Chamber of Commerce  
Australian Chamber of Commerce and Industry  
Australian Electrical and Electronic Manufacturers Association  
Australian Industry Group  
Australian Institute of Petroleum Ltd  
Australian Petroleum Production and Exploration Association  
Committee EL-023  
Electrical Compliance Testing Association  
Electrical Regulatory Authorities Council  
Energy Networks Association  
Engineers Australia  
Environmental Risk Management Authority of New Zealand  
Institute of Electrical Inspectors  
Institute of Instrumentation, Control and Automation Australia  
Mining Electrical and Mining Mechanical Engineering Society  
Ministry of Economic Development (New Zealand)  
NSW Department of Primary Industries, Mineral Resources  
National Electrical and Communications Association  
New Zealand Association of Marine, Aviation and Power Engineers  
New Zealand Employers and Manufacturers Association  
Simtars (Natural Resources, Mines and Water)  
WorkCover New South Wales

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 07068.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-014, Equipment for Explosive Atmospheres, to supersede AS/NZS 62086.1:2002 and Amendment No.1 (2003).

The objective of this Standard is to specify general and testing requirements for electrical resistance trace heaters for applications in explosive gas atmospheres.

This Standard is identical with, and has been reproduced from IEC 60079-30-1, Ed.1.0 (2007), *Explosive atmospheres – Part 30-1: Electrical resistance trace heating – General and testing requirements*.

A reference to an International Standard identified in the Normative References Clause by strikethrough (~~example~~) is replaced by a reference to the Australian or Australian/New Zealand Standard(s) listed immediately thereafter and identified by shading (**example**).

This Standard is part of a series covering electrical resistance trace heating for use in explosive gas atmospheres which comprises the following:

AS/NZS

60079 Explosive atmospheres

60079.30.1 Part 30.1: Electrical resistance trace heating—General and testing requirements  
(this Standard)

60079.30.2 Part 30.2: Electrical resistance trace heating—Application guide for design,  
installation and maintenance

As this Standard is reproduced from an International Standard a full point should be substituted for a comma when referring to a decimal marker.

## CONTENTS

	<i>Page</i>
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 General requirements .....	6
4.1 General.....	6
4.2 Terminations and connections.....	7
4.3 Circuit protection requirements for branch circuits.....	7
4.4 Control and temperature requirements .....	7
5 Testing.....	8
5.1 Type tests.....	8
5.2 Routine tests.....	19
6 Marking.....	20
6.1 Product markings for trace heaters .....	20
6.2 Markings for field-assembled components.....	20
6.3 Installation instructions .....	21
