

AS/NZS 2717.1:1996

Australian/New Zealand Standard®

**Welding—Electrodes—
Gas metal arc**

Part 1: Ferritic steel electrodes

AS/NZS 2717.1:1996

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee WD/2. It was approved on behalf of the Council of Standards Australia on 9 April 1996 and on behalf of the Council of Standards New Zealand on 22 June 1996. It was published on 5 August 1996.

The following interests are represented on Committee WD/2:

Australasian Railway Association
Australian Chamber of Commerce and Industry
Australian Institute of Steel Construction
Bureau of Steel Manufacturers of Australia
Division of Manufacturing and Technology, CSIRO
Lloyd's Register of Shipping
New Zealand Manufacturers Federation
Welding Technology Institute of Australia

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WD/2 on Welding Consumables, to supersede AS 2717.1—1984.

The objective of this Standard is to specify requirements for carbon steel electrodes and low or intermediate alloy ferritic steel electrodes for gas metal arc welding.

The classification and designation system adopted is compatible with Australian Standards for cored electrodes and submerged-arc welding electrodes, and similarly, has mechanical requirements complying with the ship classification societies' unified rules.

To assist designers and for ease of selection, the weld metal is classified according to its tensile strength and is divided into grades related to its Charpy V-notch impact energy value. The intent here is that the designer needs only to specify on the drawing the weld metal classification which will thereby nominate the mechanical properties required for the satisfactory functioning of the welded joint. The fabricator, taking into account recommendations by the manufacturer of the consumables, can select the electrode or electrode/gas combination appropriate to the materials of construction and the conditions prevailing at the time.

This edition takes cognizance of the 1993 edition of ANSI/AWS A5.18, *Specification for carbon steel electrodes and rods for gas shielded arc welding*, and incorporates the following significant technical changes:

- (a) The heat treatment condition has been added to the weld metal classification and the thermal treatment requirements have been reviewed.
- (b) Conformance tests have been made non-mandatory.
- (c) The impact test grades and requirements have been revised.
- (d) The marking and storage requirements have been reviewed.

In addition, editorial changes and adjustments have been made, including the following:

- (i) Updating of reference Standards.
- (ii) Alignment with current Standards Australia and Standards New Zealand policies.

Statements expressed in mandatory forms in notes to tables and figures are deemed to be requirements of this Standard.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.

CONTENTS

Page

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE	4
1.2 REFERENCED DOCUMENTS	4
1.3 DEFINITIONS	4
1.4 CLASSIFICATION AND DESIGNATION	4

SECTION 2 PROPERTIES AND REQUIREMENTS

2.1 SHIELDING GAS	7
2.2 ELECTRODES	7
2.3 CHEMICAL COMPOSITION	10
2.4 PHYSICAL REQUIREMENTS	10
2.5 MANUFACTURE	13
2.6 SIZES	13
2.7 FINISH, TEMPER, CAST, HELIX AND UNIFORMITY	13
2.8 COILING AND PACKAGING OF ELECTRODES	14
2.9 MARKING	18
2.10 STORAGE	19

APPENDICES

A GUIDE TO GAS METAL ARC WELDING ELECTRODES FOR FERRITIC STEELS	20
B LIST OF REFERENCED DOCUMENTS	27
C METHODS OF TEST	28
