AS 3772—1990

Australian Standard®

Fire protection of cooking areas

This Australian Standard was prepared by Committee FP/14, Fire Protection of Cooking Areas. It was approved on behalf of the Council of Standards Australia on 12 January 1990 and published on 7 May 1990.

The following interests are represented on Committee FP/14:

Air Conditioning and Mechanical Contractors Association of Australia

Australian Assembly of Fire Authorities

Australian Fire Protection Association

Australian Gas Association

Australian Hotels Association

Australian Institute of Building Surveyors

Australian Institute of Fire Technology

Australian Institute of Health Surveyors

Catering Institute of Australia

Commercial Kitchen Equipment Companies Association

Commonwealth Fire Board

Department of Administrative Services

Department of Defence

Fire Protection Industry Association of Australia

Insurance Council of Australia

Municipal Association of Victoria

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Standards Australia Committee on Fire Protection of Cooking Areas.

The fire risks associated with kitchen equipment are widely appreciated, and the need for adequate fire protection is readily apparent. This Standard draws attention to ancillary fire protection equipment such as portable extinguishers and fire blankets, but is principally concerned with performance specifications for fixed fire extinguishing systems utilizing carbon dioxide, fire extinguishing powders, wet chemicals, or water sprays. Minimum requirements for inspection and maintenance are also given herein.

© Copyright - STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
