

Australian Technical Specification

Meters for non-urban water supply

Part 2: Specification for closed conduit meters fully charged

This Australian Technical Specification was prepared by Committee CE-024, Measurement of Water Flow in Open Channels and Closed. It was approved on behalf of the Council of Standards Australia on 6 May 2008.
This Technical Specification was published on 30 June 2008.

The following are represented on Committee CE-024:

- Australian Industry Group
 - Department of Natural Resources and Water, Qld
 - Institute of Instrumentation, Control and Automation Australia
 - Irrigation Australia
 - National Measurement Institute
 - NSW Department of Commerce
 - University of South Australia
 - Water and Wastewater Association of Australia
-

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Technical Specification through their representation on the Committee.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Australian Technical Specification was prepared by the Standards Australia Committee CE-024, Measurement of Water Flow in Open Channels and Closed Conduits.

The objective of this Australian Technical Specification is to provide manufacturers with requirements for irrigation and non-urban water meters to meet the requirements of the National Water Initiative Clause 88.

It should be noted that NMI M 10-1 *Metrological and technical requirements* specifies the metrological and technical requirements for pattern approval and verification of water meters to comply with the National Measurement Regulation. Where appropriate, the requirements of this Australian Technical Specification are sourced from NMI M 10-1, *Metrological and technical requirements*, and NMI M 10-2, *Test methods*, both of which take precedence over the metrological requirements of this Australian Technical Specification.

This Australian Technical Specification includes essential requirements to maintain progress with technology in the water meter industry.

This document is part of a suite of Australian Technical Specifications covering the metering of non-urban water supply, as follows:

ATS

4747	Meters for non-urban water supply
4747.1	Part 1: Glossary of Terms
4747.2	Part 2: Specification for closed conduit meters fully charged
4747.3	Part 3: Specification for open channel meters
4747.5	Part 5: Installation and commissioning of closed conduit meters fully charged
4747.6	Part 6: Installation and commissioning of open channel meters
4747.8	Part 8: In-service compliance for closed conduit meters fully charged
4747.9	Part 9: In-service compliance for open channel meters

The ATS 4747 suite is being published in the first instance as Australian Technical Specifications. Following a period of trial and review of no more than 2 years it is intended to republish it as an Australian Standard.

The terms ‘normative’ and ‘informative’ have been used in this Australian Technical Specification to define the application of the Appendix to which they apply. A ‘normative’ Appendix is an integral part of an Australian Technical Specification. An ‘informative’ Appendix is for information and guidance only.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 APPLICATION	5
1.3 NORMATIVE REFERENCES	6
1.4 DEFINITIONS	7
1.5 PREFERRED UNITS	7
SECTION 2 MATERIALS	
2.1 GENERAL	8
2.2 RESISTANCE TO CORROSION	8
SECTION 3 DESIGN	
3.1 DIMENSIONS AND CONNECTIONS	9
3.2 SELF-CONTAINED METERS	9
3.3 FLOW COMPUTER	9
3.4 ZERO FLOW CONDITIONS	10
3.5 METER DISPLAY	10
3.6 CALIBRATION ADJUSTMENT DEVICE	13
3.7 OUTPUT	13
3.8 ELECTRONIC STORAGE	16
3.9 FREQUENCY OF MEASUREMENT	16
3.10 WATER METERS EQUIPPED WITH ELECTRONIC DEVICES	16
3.11 PROTECTIVE DEVICES	17
3.12 FROST PROTECTION	17
3.13 ELECTRONIC SEALING DEVICES	17
3.14 ENVIRONMENTAL REQUIREMENTS	18
3.15 ENCLOSURE	19
SECTION 4 PERFORMANCE REQUIREMENTS	
4.1 GENERAL	20
4.2 MEASUREMENT PERFORMANCE	20
4.3 PRESSURE LOSS	22
4.4 OPERATING TEMPERATURE	23
4.5 ULTRAVIOLET LIGHT EXPOSURE	23
4.6 ELECTROMAGNETIC SUSCEPTIBILITY	23
4.7 TORQUE RESISTANCE OF THREADED END CONNECTIONS	23
4.8 WATERTIGHTNESS	23
4.9 REVERSE FLOW	23
4.10 LEAKAGE	24
4.11 ENDURANCE	24
4.12 PERFORMANCE TESTS FOR WATER METERS WITH ELECTRONIC DEVICES	24
SECTION 5 MARKING AND PRODUCT DOCUMENTATION	
5.1 IDENTIFICATION MARKS	26
5.2 VERIFICATION MARKS	26
5.3 PRODUCT DOCUMENTATION	27
5.4 INSTALLATION INSTRUCTIONS	27
5.5 COMMISSIONING INSTRUCTIONS	27
