AS 1081.2—1990 ISO 1680/2: 1986

Australian Standard[®]

Acoustics—Measurements of airborne noise emitted by rotating electrical machinery

Part 2: Survey method

This is a free page sample. Access the full version online.

This Australian Standard was prepared by Committee AV/6, Acoustics — Machinery Noise. It was approved on behalf of the Council of Standards Australia on 2 February 1990 and published on 7 May 1990.

The following interests are represented on Committee AV/6:

Australian Coal Association

Australian Compressed Air and Mining Equipment Institute

Australian Federation of Construction Contractors

Australian and New Zealand Environmental Council

Confederation of Australian Industry

Construction Equipment Importers and Manufacturers of Australia

Council of the City of Sydney

Department of Industrial Relations and Employment, N.S.W.

Department of Labour, S.A.

Master Builders Construction and Housing Association Australia

Metal Trades Industry Association of Australia

Monash University

National Association of Australian State Road Authorities

National Farmers Federation

Outdoor Power Equipment Association

Royal Institute of Naval Architects

Tractor and Machinery Association of Australia

University of Melbourne

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This is a free preview. Purchase the entire publication at the link below:
