

AS 2614—1998

Australian Standard[™]

**Copper and copper alloys—
Sampling for chemical and
spectrochemical analysis,
and physical testing**

This Australian Standard was prepared by Committee CH/10, Analysis of Metals. It was approved on behalf of the Council of Standards Australia on 10 July 1998 and published on 5 September 1998.

The following interests are represented on Committee CH/10:

Australasian Institute of Mining and Metallurgy
Australasian Railway Association
Australian Aluminium Council
Australian Chamber of Manufactures
Copper Technical Data Centre, Australia
National Association of Testing Authorities, Australia
The Royal Australian Chemical Institute
University of New South Wales

Additional interests participating in preparation of Standard:

Superintendent Companies and Aluminium Smelters

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 97444.
