AS ISO/IEC 20000.2—2013

Australian Standard[®]

**Information technology—Service
management**

**Part 2: Guidance on the application of
service management systems**

This Australian Standard® was prepared by Committee IT-030, ICT Governance and Management. It was approved on behalf of the Council of Standards Australia on 3 October 2013.

This Standard was published on 18 October 2013.

The following are represented on Committee IT-030:

- Australian Computer Society
 - Australian Government Information Management Office
 - Australian Industry Group
 - Australian Information Industry Association
 - Australian Institute of Company Directors
 - Australian Taxation Office
 - Chartered Secretaries Australia
 - Consumers Federation of Australia
 - Council of Small Business Organisations of Australia
 - Department of Innovation, Industry, Science, Research and Tertiary Education
 - Department of State Development, Business and Innovation
 - Information Systems, Audit and Control Association
 - National ICT Australia
 - Project Management Institute
 - Risk Management Association of Australia
 - The IT Service Management Forum (Australia)
 - Web Science Australia
-

This Standard was issued in draft form for comment as DR AS ISO/IEC 20000.2.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Australian members of Standards Australia Committee IT-030, ICT Governance and Management and supersedes AS ISO/IEC 20000.2—2007, *Information Technology—Service Management, Part 2: Code of Practice*.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to provide standardization in the field of service management, and in particular guidance on the application of a service management system (SMS) based on AS ISO/IEC 20000.1.

This Standard is identical with, and has been reproduced from ISO/IEC 20000-2:2012, *Information technology—Service management, Part 2: Guidance on the application of service management systems*.

This second edition cancels and replaces the first edition (AS ISO/IEC 20000.2—2007), which has been technically revised. The main differences are as follows:

- (a) Closer alignment to AS/NZS ISO 9001.
- (b) Closer alignment to AS/NZS ISO/IEC 27001.
- (c) Change of terminology to reflect international usage.
- (d) New guidance on governance of processes operated by other parties.
- (e) More guidance on defining the scope of the SMS.
- (f) More guidance on continual improvement of the SMS and services.
- (g) More guidance on the design and transition of new or changed services.

As this Standard is reproduced from an International Standard, the following applies:

- (i) In the source text ‘this part of ISO/IEC 20000’ should read ‘this Australian Standard’.
- (iii) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian Standard</i>
ISO/IEC	AS ISO/IEC
20000 Information technology—Service management	20000 Information technology—Service management
20000-1 Part 1: Service management system requirements	20000.1 Part 1: Service management system requirements

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

1	Scope	1
1.1	General	1
1.2	Application	2
2	Normative references	2
3	Terms and definitions	2
4	Service management system general requirements	2
4.1	Management responsibility	2
4.2	Governance of processes operated by other parties	13
4.3	Documentation management	15
4.4	Resource management	17
4.5	Establish and improve the SMS	19
5	Design and transition of new or changed services	24
5.1	General	24
5.2	Plan new or changed services	25
5.3	Design and development of new or changed services	28
5.4	Transition of new or changed services	31
5.5	Documents and records	31
5.6	Authorities and responsibilities	32
6	Service delivery processes	32
6.1	Service level management	32
6.2	Service reporting	37
6.3	Service continuity and availability management	38
