

AS 1485—1983

Australian Standard[®]

**SAFETY AND HEALTH IN
WORKROOMS OF EDUCATIONAL
ESTABLISHMENTS**

This Australian standard was prepared by Committee SF/14, Safety in Workshops of Schools and Colleges. It was approved on behalf of the Council of the Standards Association of Australia on 20 December 1982 and published on 7 March 1983.

The following interests were represented on the committee responsible for the preparation of this standard:

Catholic Education Office
Confederation of Australian Industry
Department of Education, S.A.
Department of Employment and Industrial Relations (Commonwealth)
Department of Employment and Labour Relations, Qld
Department of Health, N.S.W.
Department of Industrial Affairs and Employment, S.A.
Department of Industrial Relations, N.S.W.
Department of Labour and Industry, Vic.
Department of Public Works, W.A.
Department of Technology and Further Education
Department of Works, Qld
Education Department of New South Wales
Education Department of Victoria
Education Department of Western Australia
Electricity Supply Association of Australia
Metal Trades Industry Association of Australia
National Safety Council of Australia
Railways of Australia Committee
Safety Institute of Australia

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 81302.

PREFACE

This edition of this standard was prepared by the Association's Committee on Safety in Workshops of Schools and Colleges, at the request of the Safety Standards Board, to supersede AS 1485—1973.

This edition incorporates technical and editorial amendments identified as necessary during the application of the 1973 edition, and two additional sections covering graphic arts and catering.

The standard includes safe working practices for instructors and students in workrooms of educational establishments, advice on the administration of accident reporting and accident investigation, environmental factors, and safe working methods.

It covers specific areas where definite safety measures are required in the handling of harmful substances and contains details of particular processes, workrooms with metalworking and woodworking machinery, forging, welding, casting, automotive engineering, the use of ancillary plant and equipment, graphic arts processes and catering facilities.

Concern has been expressed that workshops of universities are unique and may not be covered by adequate Australian safety standards. In this regard, it is the committee's view that such 'workshops' are covered by this standard and AS 2243, Safety in Laboratories. Standards at present under development and pertinent to the subject will cover laboratory fume cupboards and laboratory construction.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
