STORAGE WATER HEATERS Part 3—SPECIFIC REQUIREMENTS FOR WATER HEATERS WITH COMPOSITE SHELLS

[Title allocated by the Defence Cataloguing Authority:
HEATER, WATER, ELECTRIC (Storage Type, Composite Shell)
NSC 4410, 4520]

STANDARDS ASSOCIATION OF AUSTRALIA
Incorporated by Royal Charter

This Australian standard was prepared by Committee EL/20, Electrical Water Heating Appliances. It was approved on behalf of the Council of the Standards Association of Australia on 12 February 1985, and published on 10 May 1985.

The following interests are represented on Committee EL/20:

- Australian Consumers Association
- Australian Electrical and Electronic Manufacturers' Association
- Australian Gas Association
- Confederation of Australian Industry
- Electricity Supply Association of Australia
- Engineering and Water Supply Department, South Australia

Representatives of the following interests also participated in the drafting of this Standard:

- Material Suppliers

Review of Australian Standards. To keep abreast of progress in industry, Australian standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all SAA publications will be found in the Catalogue of SAA Publications; this information is supplemented each month by SAA's journal 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn standards.

Suggestions for improvements to Australian standards, addressed to the head office of the Association, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 84056.
