Geosynthetics—Guidelines on durability

RECONFIRMATION NOTICE

Technical Committee CE-020 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 7 February 2018.

The following are represented on Technical Committee CE-020:

Association of Land Development Engineers
Australian Geomechanics Society
Australian Industry Group
AUSTROADS
AWTA Product Testing (Testing Interests Australia)
Chamber of Commerce and Industry Queensland
Consult Australia
CSIRO
Department of Transport and Main Roads (Qld)
Institute of Public Works Engineering Australasia
Technical Textile and Nonwoven Association
Waste Management Association of Australia

PREFACE

This Handbook is based on ISO Technical Report 13434:1998, *Geotextiles and geotextile-related products—Guidelines on durability*, with changes to content to suit Australian conditions. The document has been broadened to include a wider range of available geosynthetic products.

The purpose of this Handbook is to provide the reader with a set of guidelines that introduce the basic concepts of geosynthetic durability including assessment. The Handbook gives consideration to design parameters, project conditions and geosynthetic properties, which lead to the definition of the appropriate tests to be performed for durability assessment.

The contribution of the Standards Australia Committee CE-020, Geosynthetics, to this Handbook is greatly recognised and appreciated.
