Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 4994.4:2017.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee BD-092, Temporary edge protection—Construction Practices.

The objective of this Standard is to provide requirements for designers of perimeter screens and platforms, guardrails, stairways and ladders that are permanently or temporarily attached to the perimeter screens, to reduce the risks to the safety of persons working on such platforms and to prevent objects falling from the protected perimeters of the permanent structure during construction.

Standards Australia thanks Natform Pty Limited for permission to reproduce the figure (see Figure C1) with modifications from the Natform eBrochure 2016. The figure is copyright of Natform Pty Limited. All rights reserved.

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.

This Standard includes a commentary on some of the clauses. The commentary directly follows the relevant clause, is designated by ‘C’ preceding the clause number and is printed in italics in a box. The commentary is for information and guidance and does not form part of the Standard.
