## PREFACE

This document is published by Standards Australia on behalf of the Agriculture and Resources Management Council Australia and New Zealand (ARMCANZ) Committee for Plumbing Product Authorizations (CPPA) or its successor. As further product specifications are developed within the Standards Australia committee system, the technical content of this Manual will change by virtue of cross-reference to Australian Standards. In no way does the publication of this document, or the participation of Standards Australia committees in the formulation of Australian Standards, alter the ultimate legal responsibility or power vested in each of the participating authorities contributing to its preparation.

*This Standard incorporates Amendment No. 1 (August 2002). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.*

Appendix B of this Manual sets out a brief summary of specific requirements or exemptions that are applicable for the relevant participating authorities.

This Edition sets out modifications, new specifications and editorial requirements.
