

AS 3688—1994

Australian Standard[®]

Water supply—Copper and copper alloy body compression and capillary fittings and threaded-end connectors

This Australian Standard was prepared by Committee WS/1, Water Fittings. It was approved on behalf of the Council of Standards Australia on 15 October 1993 and published on 17 January 1994.

The following interests are represented on Committee WS/1:

AUSTAP

Australian Chamber of Commerce and Industry

Australian Valve Manufacturers Association

Brisbane City Council

Department of Local Government, Qld

Department of Public Works, N.S.W.

Engineering and Water Supply Department, S.A.

Federated Master Plumbers of Australia

Hobart City Council

Hunter Water Corporation

Institute of Plumbing, Australia

Master Plumbers Association of South Australia

Melbourne Water

Metal Trades Industry Association of Australia

New Zealand Engineering Federation

New Zealand Manufacturers Federation

New Zealand Society of Master Plumbers and Gasfitters

Water Authority of Western Australia

Water Board, Sydney—Illawarra—Blue Mountains

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Australia/New Zealand Standards Committee WS/1 on Water Fittings, to supersede AS 3688—1990, *Water supply—Copper and copper alloy compression and capillary fittings and threaded end connectors*.

AS 3688 was first published in 1931 as Australian Standards AS B36 and AS B37. These two Standards were revised in 1969, the same year as AS B181 was first published. These three Standards were revised and redesignated as AS 1645—1974, AS 1590—1974 and AS 1585—1973 respectively. New editions of AS 1590 appeared in 1977 and 1982 while AS 1585 was revised in 1976 and 1982. The three Standards were revised and amalgamated in 1990 and published as AS 3688. This present Standard supersedes the 1990 edition.

The term ‘normative’ has been used in this Standard to define the application of the appendix to which it applies. A ‘normative’ appendix is an integral part of a Standard.

This edition includes amendments and various industrial and editorial revisions according to Standards Australia requirements.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 APPLICATION	5
1.3 REFERENCED DOCUMENTS	5
1.4 DEFINITIONS	5
1.5 DESIGNATION OF SIZE	5
1.6 MARKING	6
SECTION 2 MATERIALS	
2.1 SCOPE OF SECTION	7
2.2 COPPER	7
2.3 COPPER ALLOY	7
2.4 DEZINCIFICATION-RESISTANT COPPER ALLOY	7
2.5 STAINLESS STEEL	7
2.6 OTHER MATERIALS	7
2.7 CORROSION-RESISTANT MATERIALS	7
2.8 USE OF MATERIALS	8
2.9 CONTAMINATION OF WATER	8
SECTION 3 DESIGN AND DIMENSIONS	
3.1 SCOPE OF SECTION	9
3.2 TUBE STOP	9
3.3 SLIP FITTING	9
3.4 SPIGOTS	9
3.5 FIXING DEVICE	10
3.6 WATERWAY	10
3.7 THICKNESS OF METAL PARTS	10
3.8 SCREW THREADS	10
3.9 FABRICATED FITTINGS	11
3.10 FINISH	11
3.11 PLATING AND OTHER SURFACE FINISHES	12
SECTION 4 PERFORMANCE REQUIREMENTS	
4.1 SCOPE OF SECTION	13
4.2 PRESSURE TEST	13
4.3 STRENGTH OF FABRICATED JOINT	13
4.4 STRENGTH OF JOINT ASSEMBLY	13
4.5 RESISTANCE TO PULL-OUT	13
4.6 STRENGTH OF NUT AND ASSEMBLY	13
SECTION 5 CAPILLARY FITTINGS	
5.1 SCOPE OF SECTION	14
5.2 DIMENSIONS	14
5.3 PERFORMANCE REQUIREMENTS	15
