Consumer product safety—Guidelines for suppliers

This Australian Standard® was prepared by Committee CS-106, Consumer Product Management Systems. It was approved on behalf of the Council of Standards Australia on 1 February 2017.

This Standard was published on 24 February 2017.

The following are represented on Committee CS-106:

- Australian Competition and Consumer Commission
 - Australian Industry Group
 - Australian Toy Association
 - CHOICE
 - Consumer Electronics Suppliers Association
 - Consumers' Federation of Australia
-

This Standard was issued in draft form for comment as DR AS ISO 10377:2016.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee CS-106, Consumer Product Management Systems.

The objective of this Standard is to provide practical guidance to suppliers on assessing and managing the safety of consumer products, including effective documentation of risk assessment and risk management to meet applicable requirements.

This Standard is identical with, and has been reproduced from ISO 10377:2013, *Consumer product safety—Guidelines for suppliers*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this International Standard’ should read ‘this Australian Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

There are no normative references in the source document.

Consumer products in Australia may be subject to one or more of several different regulations depending on the nature of the product.

Suppliers need to identify all relevant regulations and take appropriate action to comply.

Information is available from the ACCC at www.productsafety.gov.au, state electrical authorities, state food authorities, NICNAS at www.nicnas.gov.au, and others.

Information may also be available from other non-government sources such as consumer and industry associations.

Suppliers are also required to consider and comply with non-safety related requirements governed by other authorities, e.g. those for certain labelling requirements, electromagnetic compatibility, etc.

CONTENTS

1	Scope	1
2	Terms and definitions	1
3	Basic principles for addressing consumer product safety	4
3.1	General	4
3.2	Promoting a product safety culture within the organization	4
3.3	Promoting a product safety culture outside the organization	5
3.4	Committing to providing safe products	5
3.5	Continual improvement	5
3.6	Precautionary approach	5
3.7	Sharing of information	5
4	General requirements	5
4.1	General	5
4.2	Commitment to providing safe consumer products	7
4.3	Continual improvement	9
4.4	Applicable laws, regulation and standards	10
4.5	Consumer product identification and traceability	10
4.6	Understanding the role of consumers	12
5	Safety in design	13
5.1	General	13
5.2	Design specification	13
5.3	Safety considerations in design	15
5.4	Documenting the design specification process	21
6	Safety in production	22
6.1	Basic principles during production	22
6.2	Production planning	23
6.3	Full production runs	24
6.4	Post production	25
6.5	Production support	26
7	Safety in the marketplace	26
7.1	General	26
7.2	Pre-purchase assessment	26
7.3	Proactive data collection and analysis	27
7.4	Ongoing assessment of consumer product conformance	28
7.5	Warranty and servicing	28
7.6	Product incident investigation	29
	Annex A (informative) Useful International Standards and Guides	30
	Annex B (informative) Information and guidance for small businesses	31
	Annex C (informative) Hazard and risk evaluation	35
	Annex D (informative) Product safety management plans	39
	Bibliography	43
