Australian/New Zealand Standard

Structural steel welding

Part 6: Welding stainless steels for structural purposes

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee WD/3, Welding of Steel Structures. It was approved on behalf of the Council of Standards Australia on 12 October 1993 and on behalf of the Council of Standards New Zealand on 21 January 1994. It was published on 24 January 1994.

The following interests are represented on Committee 00/00:

Association of Consulting Engineers, Australia
Australian Chamber of Commerce and Industry
Australian Institute of Steel Construction
Bureau of Steel Manufacturers of Australia
Department of Defence
Electricity Supply Association of Australia
Heavy Engineering Research Association, New Zealand
Institution of Engineers, Australia
Metal Trades Industry Association of Australia
Railways of Australia Committee
Steel Reinforcement Promotion Group
University of Sydney
Welding Technology Institute of Australia

**Review of Standards.** To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

#### **PREFACE**

This Standard was prepared by the Joint Australia/New Zealand Standards Committee WD/3 on Welding of Structures and is issued as a joint Standard under the terms of the Active Cooperation Agreement between Standards Australia and Standards New Zealand. The objective of this Standard is to provide rules for the welding of a wide range of welded fabrications other than pressure vessels and pressure piping, and it applies to statically and dynamically loaded welds.

This Standard requires that weld preparations, welding consumables and welding procedures be qualified before commencement of welding. Prequalified joint preparations, welding consumables and welding procedures are also given in this Standard.

Strength capacity of welds is not covered in this Standard and designers are referred to relevant design codes or specifications for this purpose.

Statements expressed in mandatory terms in notes to tables are deemed to be requirements of this Standard.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

### $@ \ Copyright - STANDARDS \ AUSTRALIA/STANDARDS \ NEW \ ZEALAND \\$

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
