AS/NZS 1365-1996

TOLERANCES FOR FLAT-ROLLED STEEL PRODUCTS

AS/NZS 1365:1996
Tolerances for flat-rolled steel products 17pp F
Specifies dimensional tolerances for flat-rolled steels in the form of wide slabs, plate and floorplate rolled on a reversing mill, hot-rolled plate, floorplate, sheet and strip, rolled on a continuous mill and cold-rolled sheet and strip. It does not apply to stainless, high alloy and quenched and tempered steels. Two classes of tolerance (A and B) are specified; Class B being the more stringent.
(MT1): Supersedes AS 1365—1986.
DR 94446: Publication date 1996-06-05.

STANDARDS ASSOCIATION OF AUSTRALIA
Incorporated by Royal Charter

This Australian standard was prepared by Committee MT/1, Iron and Steel. It was approved on behalf of the Council of the Standards Association of Australia on 21 July 1986 and published on 5 September 1986.

The following interests are represented on Committee MT/1:

Australian Foundry Institute
Australian Institute of Steel Construction
Bureau of Steel Manufacturers of Australia
Confederation of Australian Industry
Department of Defence
Institute of Metals and Materials, Australasia
Institute of Steel Services Centres of Australia
Metal Trades Industry Association of Australia
Railways of Australia Committee
Society of Automotive Engineers, Australasia

Review of Australian Standards. To keep abreast of progress in industry, Australian standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all SAA publications will be found in the Catalogue of SAA Publications; this information is supplemented each month by SAA's journal 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn standards.

Suggestions for improvements to Australian standards, addressed to the head office of the Association, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian standard should be made without delay in order that the matter may be investigated and appropriate action taken.
