Australian Standard[®]

Electrical equipment for explosive atmospheres—Dust-excluding ignition-proof (DIP) enclosure

This Australian Standard was prepared by Committee EL/14, Electrical Equipment in Hazardous Areas. It was approved on behalf of the Council of Standards Australia on 11 May 1994 and published on 11 July 1994.

The following interests are represented on Committee EL/14:

Auckland Regional Chamber of Commerce New Zealand
Australian Chamber of Commerce and Industry
Australian Coal Association
Australian Electrical and Electronics Manufacturers Association
Australian Gas Association
Australian Institute of Petroleum
Coal mining interests
Department of Mineral Resources, N.S.W.
Department of Minerals and Energy, Qld
Electricity Supply Association of Australia
Institute of Instrumentation and Control Australia
Insurance Council of Australia
Metal Trades Industry Association of Australia
Ministry of Commerce New Zealand
National Electrical Contractors Association of Australia
Regulatory authorities (electrical)
WorkCover Authority of N.S.W.

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This is a free preview. Purchase the entire publication at the link below:
