

AS 1067.2:2016
(Incorporating Amendment No. 1)

AS 1067.2:2016

Eye and face protection—Sunglasses and fashion spectacles

Part 2: Test methods (ISO 12311:2013, MOD)

This Australian Standard® was prepared by Committee CS-053, Sunglasses. It was approved on behalf of the Council of Standards Australia on 21 July 2016. This Standard was published on 30 September 2016.

The following are represented on Committee CS-053:

- Australian Competition and Consumer Commission
 - Australian Radiation Protection and Nuclear Safety Agency
 - Cancer Society of New Zealand
 - Consumer and Business Services South Australia
 - Consumers Federation of Australia
 - New Zealand Association of Optometrists
 - New Zealand Optical Wholesalers Association
 - NSW Fair Trading
 - Optical Distributors and Manufacturers Association of Australia
 - Optometrists Association Australia
 - Queensland University of Technology
 - Royal Australian and New Zealand College of Ophthalmologists
 - Sunglass Association of Australia
 - The Lions Eye Institute
 - University of Auckland, New Zealand
 - University of New South Wales
-

This Standard was issued in draft form for comment as DR AS/NZS 1067.2:2015.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

AS 1067.2:2016
(Incorporating Amendment No. 1)

Australian Standard[®]

**Eye and face protection—Sunglasses
and fashion spectacles**

**Part 2: Test methods (ISO 12311:2013,
MOD)**

Originated in Australia as part of AS 1067—1971.
Previous and first New Zealand edition part of AS/NZS 1067:2003.
Revised in part and redesignated as AS/NZS 1067.2:2016.
Reissued and redesignated as AS 1067.2:2018 incorporating
Amendment No. 1 (September 2018).

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CS-053, Sunglasses and fashion spectacles, to supersede, in part, AS/NZS 1067:2003, *Sunglasses and fashion spectacles*.

A1 | *Amendment No. 1 to this Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee CS-053, Sunglasses. As a consequence of Amendment No. 1, which is published as an Australian-only amendment, the designation of this Standard has been changed from AS/NZS 1067.2:2016 to AS 1067.2:2016.*

The objective of this Standard is to specify test methods for sunglasses and fashion spectacles (including replacement filters) in accordance with AS/NZS 1067.1:2016.

A1 | This Standard is an adoption with national modifications and has been reproduced from ISO 12311:2013 *Personal protective equipment—Test methods for sunglasses and related eyewear*. The modifications are additional requirements and are set out in Appendix ZZ, which has been added at the end of the source document.

Appendix ZZ lists variations to take account of differences between AS/NZS 1067.1:2016, *Eye and face protection—Sunglasses and fashion spectacles, Part 1: Requirements* and ISO 12312-1:2013, *Eye and face protection—Sunglasses and related eyewear—Part 1: Sunglasses for general use* and Appendix ZZ of AS/NZS 1337.0, *Personal eye protection, Part 0: Eye and face protection—Vocabulary (ISO 4007:2012, MOD)*.

As this Standard is reproduced from an International Standard, the following applies:

- A1 |
- (a) In the source text ‘this International Standard’ should read ‘this Australian Standard’.
 - (b) A full point substitutes for a comma when referring to a decimal marker.

Only normative references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

CONTENTS

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Prerequisites	1
5 General test requirements	2
6 Test methods for assessing the construction and materials	2
6.1 Prior assessment of construction, marking and information	2
6.2 Test method for assessment of filter material and surface quality	2
7 Test methods for measuring spectrophotometric properties	3
7.1 Measurement of spectral transmittance $\tau(\lambda)$	3
7.2 Measurement of uniformity of luminous transmittance	5
7.3 Calculation of ultraviolet transmittance	7
7.4 Calculation of solar blue-light transmittance τ_{sb}	9
7.5 Calculation of solar IR transmittance τ_{SIR}	9
7.6 Measurement of absolute spectral reflectance $\rho(\lambda)$	9
7.7 Absolute luminous reflectance ρ_v	10
7.8 Calculation of relative visual attenuation quotient for signal light detection Q_{signal}	11
7.9 Wide angle scatter	11
7.10 Polarizing filters	14
7.11 Photochromic filters	17
8 Test methods for measuring optical properties	19
8.1 Test method for spherical, astigmatic and prismatic refractive powers	19
8.2 Test method for the prism imbalance of complete sunglasses or filters covering both eyes	23
8.3 Test method for local variations in refractive power	25
9 Test methods for mechanical properties	30
9.1 Test method for minimum robustness of filters	30
9.2 Test method for impact resistance of filters, strength level 1	33
9.3 Test method for impact resistance of sunglasses, strength level 1	35
9.4 Test method for impact resistance of sunglasses, strength level 2	36
9.5 Test method for impact resistance of sunglasses, strength level 3	37
9.6 Test method for frame deformation and filter retention	39
9.7 Test method for increased endurance of sunglasses	42
9.8 Test method for resistance to solar radiation	46
9.9 Test method for resistance to ignition	48
9.10 Test for resistance to perspiration of the sunglass frame	48
Annex A (normative) Application of uncertainty of measurement	52
Annex B (informative) Sources of uncertainty in spectrophotometry and their estimation and control	54
Annex C (informative) Definitions in summations form	61
Annex D (normative) Product of the energy distribution of Standard Illuminant D65 as specified in ISO 11664-2 and the spectral visibility function of the average human eye for daylight vision as specified in ISO 11664-1	65
Annex E (normative) Spectral functions for the calculation of solar UV and solar blue light transmittance values	66
Annex F (normative) Spectral distribution of solar irradiance in the infrared spectrum for the calculation of the solar infrared transmittance^[7]	68
