

AS/NZS 61558.1:2008
(Incorporating Amendments up to and including No. 3)

Australian/New Zealand Standard™

Safety of Power Transformers, Power Supplies, Reactors and Similar Products

Part 1: General requirements and tests (IEC 61558-1 Ed 2.1, MOD)

AS/NZS 61558.1:2008

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee EL-002, Safety of Household and Similar Electrical Appliances and Small Power Transformers and Power Supplies. It was approved on behalf of the Council of Standards Australia on 1 May 2008 and by the Council of Standards New Zealand on 11 April 2008.

This Standard was published on 30 May 2008.

The following are represented on Committee EL-002:

- Association of Accredited Certification Bodies
- Australian Industry Group
- National Retailers Association (Australia)
- Business New Zealand
- Consumer Electronic Suppliers Association, Australia
- Consumers' Federation of Australia
- Electrical Regulatory Authorities, Australia
- Electrical consultants
- Engineers Australia
- JAS-ANZ
- Testing Interests New Zealand
- WorkSafe, New Zealand
- New Zealand Electric Fence Energizer Manufacturers' Standards Group

This Standard was issued in draft form for comment as DR 07958.

Australian/New Zealand Standard™

Safety of Power Transformers, Power Supplies, Reactors and Similar Products

Part 1: General requirements and tests (IEC 61558-1 Ed 2.1, MOD)

Originated, in part, in Australia as AS C126—1939.
Second edition C126—1958.
Revised and redesignated AS 3126—1981 (withdrawn 1989).
Originated, in part, in Australia as AS C167—1962.
Revised and redesignated AS 3167—1981 (withdrawn 1987).
AS 3126—1981 and AS 3167—1981 were revised and redesignated AS 3108.1—1984,
AS 3108.2—1984 and AS 3108.3—1984.
Revised, amalgamated and redesignated AS 3108—1990.
First published in New Zealand as NZS/AS 3108:1990.
Jointly revised and redesignated AS/NZS 3108:1994.
Jointly revised and redesignated, in part, as AS/NZS 61558.1:2000.
Jointly revised and redesignated, as AS/NZS 61558.1:2008.
Reissued incorporating Amendment No 1 (October 2009).
Reissued incorporating Amendment No 2 (November 2015).
Reissued incorporating Amendment No 3 (November 2020).

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	9
2 Normative references	11
3 Terms and definitions	15
4 General requirements	27
5 General notes on tests	28
6 Ratings.....	30
7 Classification.....	30
8 Marking and other information	31
9 Protection against electric shock	36
10 Change of input voltage setting	39
11 Output voltage and output current under load	39
12 No-load output voltage	40
13 Short-circuit voltage	40
14 Heating	40
15 Short circuit and overload protection	46
16 Mechanical strength	50
17 Protection against harmful ingress of dust, solid objects and moisture.....	52
18 Insulation resistance, dielectric strength and leakage current	56
19 Construction	59
20 Components	66
21 Internal wiring.....	71
22 Supply connection and other external flexible cables or cords	72
23 Terminals for external conductors.....	78
24 Provisions for protective earthing	80
25 Screws and connections	81
26 Creepage distances, clearances and distances through insulation.....	84
27 Resistance to heat, fire and tracking.....	92
28 Resistance to rusting.....	95
 Annex A (normative) Measurement of creepage distances and clearances	102
Annex B (normative) Testing a series of transformers.....	106
Annex C (normative) Creepage distances (cr), clearances (cl) and distances through insulation (dti) Material group II ($400 \leq CTI < 600$)	108
Annex D (normative) Creepage distances (cr), clearances (cl) and distances through insulation (dti) Material group I ($CTI \geq 600$).....	111
Annex E (normative) Glow-wire test.....	114
Annex F (normative) Requirements for manually operated switches which are parts of transformers assembly	115
Annex G (normative) Tracking test.....	118
Annex H (normative) Electronic circuits.....	119

COPYRIGHT

Annex I (void)	123
Annex J (normative) Measuring network for touch-currents	124
Annex K (normative) Insulated winding wires for use as multiple layer insulation	125
Annex L (normative) Routine tests (production tests)	127
Annex M (informative) Examples to be used as a guide for 19.1	129
Annex N (informative) Examples of points of application of test voltages	132
Annex O (void)	134
Annex P (informative) Examples of points of measurement of creepage distances and clearances	135
Annex Q (informative) Explanation of IP numbers for degrees of protection	137
Annex R (normative) Explanations of the application of 4.1.1.2.1 of IEC 60664-1 (see 26.2)	139
Annex S (void)	140
Annex T (void)	141
Annex U (informative) Optional t_w -marking of transformers	142
Annex V (informative) Symbols to be used for thermal cut-outs	151
Annex W (normative) Coated printed circuit boards	152
Annex ZZ (informative) Variations to IEC 61558-1 Ed 2.1 for application in Australia and New Zealand	153
 Bibliography	 155
Index of defined terms	157
 Figure 0 – IEC 61558 principle	 8
Figure 1 – Mounting box for flush-type transformer (see 5.10)	96
Figure 2 – Standard test finger (see 9.1.2, 15.5.2 and IEC 61032, test probe B)	97
Figure 3 – Test pin (see 9.2 and IEC 61032, test probe 13)	98
Figure 4 – Abrasion resistance test for insulating coated layers	98
Figure 5 – Ball-pressure apparatus (see 27.1)	99
Figure 6 – Test arrangement for checking mechanical withstanding of insulating materials in thin sheet layers (see 26.3)	100
Figure 7 – Flexing test apparatus (see 22.9.4)	101
Figure 8 – Test configuration: single-phase equipment on star TN or TT system	101
Figure H.1 – Example of an electronic circuit with low-power points (see H.2.2)	122
Figure J.1 – Measuring network for touch-current	124
Figure U.1 – Relation between winding temperature and endurance test duration	149
Figure U.2 – Assessment of claimed value of S	150
