IEC 60079-15 Ed. 4.0 (2010)

AS/NZS 60079.15:2011

Australian/New Zealand Standard™

Explosive atmospheres

**Part 15: Equipment protection by type
of protection ‘n’**

AS/NZS 60079.15:2011

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-014, Explosive Atmospheres. It was approved on behalf of the Council of Standards Australia on 1 August 2011 and on behalf of the Council of Standards New Zealand on 21 July 2011.

This Standard was published on 25 August 2011.

The following are represented on Committee EL-014:

Auckland Regional Chamber of Commerce
Australian Chamber of Commerce and Industry
Australian Coal Association
Australian Industry Group
Australian Institute of Petroleum
Australian Institute of Refrigeration Air Conditioning and Heating
Australian Petroleum Production and Exploration Association
Australian Pipeline Industry Association
Bureau of Steel Manufacturers of Australia
Consult Australia
Department of Industry and Investment, NSW
Department of Mines and Energy, Qld
Electrical Compliance Testing Association
Electrical Contractors Association of New Zealand
Electrical Regulatory Authorities Council
Energy Networks Association
Engineers Australia
Environmental Protection Authority New Zealand
Institute of Electrical Inspectors
Institute of Instrumentation, Control and Automation Australia
Institution of Professional Engineers New Zealand
Mining Electrical and Mining Mechanical Engineering Society
Ministry of Economic Development, New Zealand
National Electrical and Communications Association
New Zealand Employers and Manufacturers Association (Central)
The Aviation and Marine Engineers Association
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 60079.15.

AS/NZS 60079.15:2011

Australian/New Zealand Standard™

Explosive atmospheres

Part 15: Equipment protection by type of protection 'n'

Originated in Australia as AS 2238—1979.
Previous edition AS/NZS 60079.15:2006.
Second edition 2011.

PREFACE

This Standard was prepared by Joint Standards Australia/Standards New Zealand Committee EL-014, Explosive Atmospheres to supersede AS/NZS 60079.15:2006, *Electrical apparatus for explosive gas atmospheres*, Part 15: *Construction, test and marking of type of protection, 'n' electrical apparatus*.

The objective of this Standard is to establish the specific requirements for construction, testing and marking for Group II electrical equipment with type of protection, 'n' intended for use in explosive gas atmospheres. It is intended to be read in conjunction with AS/NZS 60079.0.

The objective of this revision is to adopt the current edition of IEC 60079-15.

This Standard is identical with, and has been reproduced from IEC 60079-15 Ed. 4.0 (2010), *Explosive atmospheres*, Part 15: *Equipment protection by type of protection 'n'*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text 'this part of IEC 60079' should read 'this part of AS/NZS 60079'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

Only international references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

It should be noted that many other parts of IEC 60079 and IEC 61241 are now published as identically-numbered parts of AS/NZS 60079 and AS/NZS 61241 respectively. The latter should be referenced when necessary.
