AS 1288 Supplement 1—2006

Glass in buildings—Selection and installation (Supplement to AS 1288—2006)

This Australian Standard Supplement was prepared by Committee BD-007, Glazing and Fixing of Glass. It was approved on behalf of the Council of Standards Australia on 17 March 2006.

This Supplement was published on 28 March 2006.

The following are represented on Committee BD-007:

Association of Accredited Certification Bodies
Australian Building Codes Board
Australian Chamber of Commerce and Industry
Australian Glass and Glazing Association
Australian Industry Group
Australian Institute of Building Surveyors
Australian Shop and Office Fitting Industry Association
Australian Window Association
Building Research Association of New Zealand
CSIRO Manufacturing and Infrastructure Technology
Department of Local Government WA
Energy Efficiency and Conservative Authority of New Zealand
Housing Industry Association
Institution of Engineers Australia
International Window Film Association Institute
Master Builders Australia
Monash University
New Zealand Plastics Glazing Materials Suppliers
New Zealand Safety Glass Association
Plastics and Chemicals Industries Association Incorporated
University of New South Wales
University of Sydney
Window Association of New Zealand
Window and Door Industry Council

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Supplement was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee BD-007, Glazing and Fixing of Glass. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Supplement is to provide tables for minimum glass thicknesses calculated for stress at the ultimate limit state wind pressures and for deflection at serviceability limit state wind pressures. This Supplement is intended as a companion document to AS 1288—2006, *Glass in buildings—Selection and installation*.

This Supplement is the result of a consensus among representatives on the Committee that it be produced as an Australian Standard.

In the preparation of this Standard valuable assistance was given by organizations and individuals experienced in various aspects of design and use of glass, and the Committee acknowledges their help.

CONTENTS

	<i>Page</i>
SECTION 1 GENERAL.....	4
SECTION 2 GLASS THICKNESS CALCULATED FOR STRESS AT ULTIMATE LIMIT STATE—FOUR-EDGE SUPPORT	5
SECTION 3 GLASS THICKNESS CALCULATED FOR DEFLECTION AT SERVICEABILITY LIMIT STATE—FOUR-EDGE SUPPORT	101
SECTION 4 GLASS THICKNESS CALCULATED FOR STRESS AT ULTIMATE LIMIT STATE—TWO-EDGE SUPPORT.....	161
SECTION 5 GLASS THICKNESS CALCULATED FOR DEFLECTION AT SERVICEABILITY LIMIT STATE—TWO-EDGE SUPPORT	174
SECTION 6 FACETED GLAZING	187
SECTION 7 FIN-SUPPORTED GLAZING	
7.1 DETERMINATION OF MINIMUM FIN THICKNESS	190
7.2 DETERMINATION OF FIN DEPTH.....	192
