## Australian Standard®

# Transport packaging for dangerous goods—Plastics compatibility testing

This Australian Standard® was prepared by Committee CH-009, Safe Handling of Chemicals. It was approved on behalf of the Council of Standards Australia on 13 July 2007. This Standard was published on 12 September 2007.

The following are represented on Committee CH-009:

- ACCORD Australia
- Agsafe
- Australasian Fire Authorities Council
- Australian Institute of Petroleum
- Australian Paint Manufacturers' Federation
- Consumers Federation of Australia
- Department of Consumer and Employment Protection, WA
- Department of Emergency Services, Qld
- Department of Environment and Conservation, NSW
- Department of the Premier and Cabinet, SA
- Engineers Australia
- New Zealand Chemical Industry Council
- Plastics and Chemicals Industries Association
- Tranz Rail (New Zealand)
- Victorian WorkCover Authority

This Standard was issued in draft form for comment as DR 07262.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

### Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au** 

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

#### **PREFACE**

This Standard was prepared by Standards Australia/Standards New Zealand Committee CH-009, Safe Handling of Chemicals. It is identical with, and has been reproduced from, ISO 16101:2004, Packaging—Transport packaging for dangerous goods—Plastics compatibility testing.

As this Standard is reproduced from an international standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) The words 'this European Standard' should be replaced with 'this Australian Standard' wherever they appear.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to European and International Standards should be replaced by references to Australian Standard, as follows:

	European/International Standard	Australian Standard		
EN ISO 291	Plastics—Standard atmospheres	AS 1327	Plastics—Standard atmospheres	
2)1	for conditioning and testing	1327	for conditioning and testing	
527	Plastics—Determination of tensile properties	1145	Determination of tensile properties	
527-2	Part 2: Test conditions for moulding and extrusion plastics	1145.2	Part 2: Test conditions for moulding and extrusion plastics	
16104	Packaging—Transport packaging for dangerous goods—Test methods	16104	Transport packaging for dangerous goods—Test methods	
EN ISO/IEC		AS ISO/IEC		
17025	General requirements for the competence of testing and calibration laboratories	17025	General requirements for the competence of testing and calibration laboratories	

Only references that have been adopted as Australian Standards have been listed.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the annex to which they apply. A 'normative' annex is an integral part of a Standard, whereas an 'informative' annex is only for information and guidance.
