

Australian Standard™

**Common specifications for high-voltage
switchgear and controlgear standards
(IEC 60694, Ed.2.2(2002) MOD)**

This Australian Standard was prepared by Committee EL-007, Power Switchgear. It was approved on behalf of the Council of Standards Australia on 16 March 2005. This Standard was published on 27 May 2005.

The following are represented on Committee EL-007:

Australian British Chamber of Commerce
Australian Electrical and Electronic Manufacturers Association
Energy Networks Association
Engineers Australia
Testing interests (Australia)

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 05010.

AS 2650—2005

Australian Standard™

**Common specifications for high-voltage
switchgear and controlgear standards
(IEC 60694, Ed.2.2(2002) MOD)**

Originated as AS 2650—1983.
Previous edition 1986.
Jointly revised and designated AS/NZS 2650:2000.
Dejointed and revised as AS 2650—2005.

PREFACE

This Standard was prepared by the Standards Australia Committee EL-007, Power Switchgear, to supersede AS/NZS 2650:2000.

The objective of this Standard is to state those specifications common to high-voltage switchgear and controlgear within the scope of the Standard.

This Standard is an adoption with national modifications and has been reproduced from IEC 60694, Ed.2.2(2002), *Common specifications for high-voltage switchgear and controlgear standards*, and has been varied as indicated to take account of Australian conditions.

Variations to IEC 60694, Ed.2.2(2002) are indicated at the appropriate places throughout this Standard. Strikethrough (~~example~~) identifies IEC text, tables and figures which, for the purposes of this Australian Standard, are deleted. Where text, tables or figures are added, each is set in its proper place and identified by shading (example). Added figures are not themselves shaded, but are identified by a shaded border.

This Standard differs from the Standard it supersedes in the following major areas:

- (a) Standard is now Australian only to reflect the withdrawal of New Zealand participation in Committee EL-007.
- (b) Definitions have been updated.
- (c) 'Rated supply voltage of closing and opening devices and of auxiliary and control circuits' (Subclause 4.8) has been replaced.
- (d) Tables 14 and 15 replace tables 4 and 5.
- (e) 'Auxiliary and control equipment' (Subclause 5.4) has been replaced.
- (f) New figures 4,5,6,7 and 8 have been added.
- (g) Electromagnetic compatibility (Subclause 5.18) has been replaced.
- (h) The title and text of Subclause 6.2.10 has been replaced.
- (i) The title and text of Subclause 6.4.2 has been replaced.
- (j) Subclauses 6.9.1 to 6.9.7 and table 13 have been replaced.
- (k) Additional tests on auxiliary and control circuits (Subclause 6.10) have been added.
- (l) New annex 'Electromagnetic compatibility site measurements' (Annex H) has been added.
- (m) Bibliography (Annex G) has been updated.
- (n) References have been updated.

As this Standard is reproduced from an International Standard, the following applies:

- (i) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (ii) In the source text 'this international standard' should read 'this Australian Standard'.
- (iii) A full point should be substituted for a comma when referring to a decimal marker.
- (iv) Any French text on figures should be ignored.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

CONTENTS

	<i>Page</i>
1 General.....	1
1.1 Scope	1
1.2 Normative references.....	1
2 Normal and special service conditions	7
2.1 Normal service conditions	8
2.2 Special service conditions.....	9
3 Definitions.....	10
3.1 General terms.....	10
3.2 Assemblies of switchgear and controlgear	12
3.3 Parts of assemblies	13
3.4 Switching devices	13
3.5 Parts of switchgear and controlgear	13
3.6 Operation.....	17
3.7 Characteristic quantities	21
3.8 Index of definitions.....	21
4 Ratings	22
4.1 Rated voltage (U_r).....	23
4.2 Rated insulation level.....	23
4.3 Rated frequency (f_r)	27
4.4 Rated normal current and temperature rise	27
4.5 Rated short-time withstand current (I_k).....	30
4.6 Rated peak withstand current (I_p).....	30
4.7 Rated duration of short circuit (t_k)	30
4.8 Rated supply voltage of closing and opening devices and of auxiliary and control circuits (U_a).....	30
4.9 Rated supply frequency of closing and opening devices and of auxiliary circuits.....	32
4.10 Rated pressure of compressed gas supply for insulation and/or operation	32
5 Design and construction.....	32
5.1 Requirements for liquids in switchgear and controlgear.....	32
5.2 Requirements for gases in switchgear and controlgear	32
5.3 Earthing of switchgear and controlgear	33
5.4 Auxiliary and control equipment	33
5.5 Dependent power operation	43
5.6 Stored energy operation.....	43
5.7 Independent manual operation	44
5.8 Operation of releases.....	44
5.9 Low- and high-pressure interlocking and monitoring devices.....	45
5.10 Nameplates.....	45
5.11 Interlocking devices	46
5.12 Position indication.....	46
5.13 Degrees of protection by enclosures	47
5.14 Creepage distances	48
5.15 Gas and vacuum tightness.....	49
5.16 Liquid tightness.....	49
