Australian/New Zealand Standard™

Edison screw lampholders (IEC 60238, Ed.8.0 (2004) MOD)

AS/NZS 60238:2007

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-041, Lamps and Related Equipment. It was approved on behalf of the Council of Standards Australia on 8 December 2006 and on behalf of the Council of Standards New Zealand on 15 December 2006.

This Standard was published on 22 January 2007.

The following are represented on Committee EL-041:

Association of Consulting Engineers, Australia
Australian Electrical and Electronic Manufacturers Association
Australian Industry Group
Certification Interests (New Zealand)
Consumers' Federation of Australia
Electrical Compliance Testing Association
Electrical Regulatory Authorities Council
Energy Efficiency and Conservation Authority of New Zealand
Illuminating Engineering Society of Australia and New Zealand
IES: The Lighting Society
Institution of Professional Engineers (NZ)

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 06112.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-041, Lamps and Related Equipment.

This Standard will co-exist with the revised publication of AS/NZS 3140 until 30 December 2016, on which date AS/NZS 3140 will be withdrawn. While both the Standards remain current, the requirements from either Standard are not allowed to be mixed, unless otherwise stated exclusively in the Standard.

The objective of this Standard is to specify particular requirements for Edison screw lampholders used in general purpose lighting.

This Standard has been reproduced from IEC 60238, Ed.8.0 (2004), *Edison screw lampholders*, and modified to suit Australian/New Zealand conditions.

Variations to IEC 60238, Ed.8.0 (2004) are indicated at the appropriate places throughout this standard. Strikethrough (example) identifies IEC text, tables and figures which, for the purposes of this Australian/New Zealand Standard, are deleted. Where text, tables or figures are added, each is set in its proper place and identified by shading (example). Added figures are not themselves shaded, but are identified by a shaded border.

This Standard satisfies the requirements covered in AS/NZS 3820, Essential safety requirements for low voltage equipment.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'IEC 60238' should read 'AS/NZS 60238'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

CONTENTS

		Page			
1	General	1			
	1.1 Scope	1			
	1.2 Normative references	2			
2	Definitions	3			
3	General requirement				
4	General conditions for tests				
5	Standard ratings				
6	Classification	9			
7	Marking	10			
8	Dimensions	12			
9	Protection against electric shock	14			
10	Terminals	16			
11	Provision for earthing	20			
12	Construction	21			
13	Switched lampholders	26			
14	Moisture resistance, insulation resistance and electric strength	27			
15	Mechanical strength	29			
16	Screws, current-carrying parts and connections	34			
17	Creepage distances and clearances	35			
18	Normal operation	38			
19	General resistance to heat	39			
20	Resistance to heat, fire and tracking	42			
21	Resistance to excessive residual stresses (season cracking) and to rusting	45			
Anr	nex A (normative) Season cracking/corrosion test	47			
Anr	nex B (informative) Guidance for requirements in IEC 61058-1 applicable to switches in lampholders (see 13.2)	49			
Anr	nex C (informative) Guidance for special requirements in appliance standards – Household and similar electrical appliances	50
