Steel Stacks

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Three Park Avenue • New York, NY • 10016 USA

Date of Issuance: April 26, 2011

The next edition of this Standard is scheduled for publication in 2014. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Periodically certain actions of the ASME STS Committee may be published as Cases. Cases and interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org> as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Foreword	iv
Committee Roster	v
Correspondence With the Steel Stacks Committee	vi
Introduction	vii
1 Mechanical Design	1
2 Materials	4
3 Linings and Coatings	7
4 Structural Design	12
5 Dynamic Wind Loads	20
6 Access and Safety	23
7 Electrical	29
8 Fabrication and Erection	29
9 Inspection and Maintenance	31
10 References	33
Figures	
6.2.6-1 Example of the General Construction of Cages	24
6.2.6-2 Minimum Ladder Clearances	25
6.3.6-1 Ladder Dimensions, Support Spacing, and Side Clearances	26
6.3.8-1 Landing Platform Dimensions	27
Tables	
4.4.6-1 Factors of Safety	16
4.4.7-1 Minimum Fabricated Plate Thickness and Maximum Stiffener Spacing	16
4.10.1.3-1 Cable Selection Criteria	18
5.2.1.2-1 Representative Structural Damping Values (β_s)	21
Mandatory Appendix	
I Structural Design	35
Nonmandatory Appendices	
A Mechanical Design	46
B Materials for Ambient and Elevated Temperature Service	60
C Linings and Coatings	75
D Structural Design	80
E Example Calculations	86
F Conversion Factors: U.S. Customary to SI (Metric)	95
