## FOREWORD

American National Standards Committee B89 on Dimensional Metrology, organized under the procedures of the American National Standards Institute, was formed to develop certain minimum standards for the various parameters in metrology and represents the consensus of United States industry. The various subcommittees of Committee B89 deal with the different parameters, i.e., environment, angle, length, geometry, etc. Subcommittee B89.6 is assigned the task of developing standards in physical environment and the effects of this environment and other extraneous influences on accuracy and precision of dimensional measurements. This standard for temperature and humidity is the work of the ANSI B89.6.2 Working Group. The results of its cooperative efforts are expressed in this document.

The effect of heat flow and resulting temperature gradients, differences and variation from measurement to measurement can result in errors of dimensional measurement because of the thermal expansion properties of materials. By international agreement the true size and shape of an object is that which exists at a uniform temperature of 68° F (20° C). The purpose of this standard is to provide American industry with practical requirements, procedures, and methods by which the intent of the international agreement can be satisfied without compromise to economical operation.

In discharging its responsibilities, the Working Group has recognized two basic needs of industry. First, it recognizes the need for standard approaches to the buying and selling of artificially controlled environments. Second, it recognizes the need for the qualification of individual measurements regarding errors induced by non-ideal temperature conditions.

Standard specifications for artificially controlled environments, in terms of the quality of temperature control, are especially necessary as a means of communicating metrological requirements to construction agencies such as heating and air-conditioning contractors. In specific instances, sufficient experience has been obtained such that required dimensional accuracies can be translated directly into temperature control specifications. However, the Working Group has concluded that no general set of temperature control specifications can be stated that will simultaneously assure levels of measurement accuracy and avoid the risk of overdesign or underdesign. Indeed, no recommendation can be made on which type of artificial environment, or even whether one is necessary or not, that would represent the most satisfactory engineering for every application. Consequently, the Working Group has chosen to list those properties of an artificially controlled environment that must be specified for an adequate description, to specify standard procedures for the administration of the required specifications, and to provide advisory information in the form of guidelines that the users of this standard may find helpful in the development of specifications adapted to individual needs.

The metrologist, his management, or a potential customer of a metrological service has, each for his own purpose, a need and a right to know the magnitude of measurement errors induced by the thermal environment. Therefore, this standard includes a description of procedures for the estimation of the error contributions caused by various defects of the thermal environment. Further, there is a need for a convenient means of communication between these parties. For this purpose, the Working Group has provided a standard figure of merit, the Thermal Error Index. Because this document, for the first time, presents the Thermal Error Index for use by industry at large, the methods for its determination and use are carefully developed in an appendix.

Recommendations for the control of humidity in metrological environments are included in this document, because it is often directly affected by and related to the control of temperature, especially in the design of room enclosures.

After approval by the B89 National Standards Committee and submittal to public review the Standard was approved by ANSI as a National Standard on October 30, 1973.

## AMERICAN NATIONAL STANDARDS COMMITTEE B89

### DIMENSIONAL METROLOGY

(The following is the roster of the Committee at the time of approval of this Standard)

#### OFFICERS

E. G. Loewen, *Chairman*  
J. K. Emery, *1st Vice-Chairman*      J. C. Moody, *2nd Vice-Chairman*  
Mary Hoskins, *Executive Secretary*

#### AEROSPACE INDUSTRIES ASSOCIATION OF AMERICA, INC.

M. J. Leight, *Metrology Section, Primary Standards Laboratories, Hughes Aircraft Company, Culver City, California*

#### AMERICAN ORDNANCE ASSOCIATION

J. C. Moody, *Sandia Corporation, Albuquerque, New Mexico*

#### AMERICAN SOCIETY FOR QUALITY CONTROL

John Novotny, *Sperry Gyroscope, Great Neck, New York*

#### AMERICAN SOCIETY FOR TESTING AND MATERIALS

H. J. Stremba, *Associate Director, Technical Operations, AST&M, Philadelphia, Pennsylvania*

#### AMERICAN SOCIETY OF MECHANICAL ENGINEERS, THE

I. H. Fullmer, *Mt. Dora, Florida*

F. J. Meyer, Jr., *Machine Tool Engineering Associates International, Forestdale, Rhode Island*

P. A. Smith, *Professor, Massachusetts Institute of Technology, Cambridge, Massachusetts*

#### INSTITUTE OF ELECTRICAL & ELECTRONIC ENGINEERS

B. E. Lenehan, *Bloomfield, New Jersey*

#### INSTRUMENT SOCIETY OF AMERICA

J. M. Cameron, *National Bureau of Standards, Washington, D.C.*

Herbert France, *Stanley Works, New Britain, Connecticut*

L. N. Combs, *Alternate, E.I. DuPont de Nemours & Company, Incorporated, Wilmington, Delaware*

#### NATIONAL MACHINE TOOL BUILDERS ASSOCIATION

R. B. Clegg, *Kearney & Trecker Corporation, Milwaukee, Wisconsin*

#### SOCIETY OF MANUFACTURING ENGINEERS

J. A. Cariello, *Essex Junction, Vermont*

V. E. Diehl, *Shelton Metrology Laboratory, Paducah, Kentucky*

#### U.S. DEPARTMENT OF THE AIR FORCE

R. L. Martin, *Aerospace Guidance & Metrology Center, Newark, Ohio*

#### U.S. DEPARTMENT OF THE ARMY

M. L. Fruechtenicht, *Army Metrology & Calibration Center, Redstone Arsenal, Alabama*

O. M. Solovei, *Edgewood Arsenal, Maryland*

T. W. Kane, *Quality Assurance Directorate, Watervliet Arsenal, Watervliet, New York*

R. B. Smock, *Physical Standards Laboratory, Army Metrology & Calibration Center, Redstone Arsenal, Alabama*

J. M. McKinley, *U.S. Army Development & Proof Services, Aberdeen Proving Ground, Maryland*

#### U.S. DEPARTMENT OF COMMERCE—NATIONAL BUREAU OF STANDARDS

A. G. Strang, *Optical Physics Division, National Bureau of Standards, Washington, D.C.*

D. B. Spangenberg, *Alternate, Naval Weapons Engineering Support Activity, Washington Navy Yard, Washington, D.C.*

#### U.S. DEPARTMENT OF THE NAVY

E. R. Johnson, *Chief of Naval Material, Department of the Navy, Washington, D.C.*

J. N. Cornette, *Naval Ship Systems Command, Washington, D.C.*

#### UNIVERSITY OF CALIFORNIA

J. B. Bryan, *Lawrence Livermore Laboratory, Livermore, California*

**FEDERAL ELECTRIC CORPORATION**

*S. P. Cholewa, Federal Electric Corporation, Kennedy Space Center, Florida*

**ENGIS CORPORATION**

*Dale W. Freyberg, Engis Corporation, Morton Grove, Illinois*

*R. J. Reilly, Alternate, Engis Corporation, Morton Grove, Illinois*

**GURLEY TELEDYNE**

*Ralph Geiser, Research & Development Laboratory, Gurley Teledyne, Troy,  
New York*

**METROLONICS STANDARDS LABORATORIES**

*J. A. Harrington, Metrolonics Standards Laboratories, Burbank, California*

**CUMMINS ENGINE COMPANY**

*M. E. Hoskins, Cummins Engine Company, Columbus, Indiana*

**AUTONETICS-NORTH AMERICAN AVIATION, INCORPORATED**

*J. A. Hall, Autonetics, Anaheim, California*

**MOORE SPECIAL TOOL COMPANY, INCORPORATED**

*A. E. Johnson, Moore Special Tool Company, Incorporated, Bridgeport, Connecticut*

*A. W. Young, Alternate, Moore Special Tool Company, Incorporated, Bridgeport, Connecticut*

**FEDERAL PRODUCTS CORPORATION**

*T. L. Johnson, Jr., Research & Development, Federal Products Corporation,  
Providence, Rhode Island*

*C. Whitney, Alternate, New Products Division, Federal Products Corporation,  
Providence, Rhode Island*

**THE VAN KEUREN COMPANY**

*R. W. Lampert, The Van Keuren Company, Watertown, Massachusetts*

**BAUSCH & LOMB, INCORPORATED**

*E. G. Loewen, Gratings & Metrology Research, Bausch & Lomb, Incorporated, Rochester, New York*

**GENERAL ELECTRIC COMPANY**

*W. B. McCallum, Knolls Atomic Power Laboratory, Schenectady, New York*

**SPERRY GYROSCOPE**

*John Novotny, Sperry Gyroscope Company, Great Neck, New York*

**GREENFIELD TAP & DIE-UNITED-GREENFIELD DIVISION OF TRW, INCORPORATED**

*H. W. Parker, Greenfield Tap & Die, Greenfield, Massachusetts*

**INTERNATIONAL BUSINESS MACHINE CORPORATION**

*Alvin Miller, I.B.M., Endicott, New York*

**STANDRIDGE GRANITE CORPORATION**

*Ray Standridge, Standridge Granite Corporation, Whittier, California*

**THE BENDIX CORPORATION**

*Leo Tschechtelin, Tool & Gage Inspection & Control, The Bendix Corporation, Kansas City, Missouri*

*F. W. Witzke, Automation & Measurement Division, The Bendix Corporation, Dayton, Ohio*

**BROWN & SHARPE MANUFACTURING COMPANY**

*E. L. Wotelet, Brown & Sharpe Manufacturing Company, North Kingston, Rhode Island*

**L. S. STARRETT COMPANY**

*G. B. Webber, Webber Gage Division, L.S. Starrett Company, Cleveland, Ohio*

**INDIVIDUAL MEMBERS:**

*E. M. Pearne, Nuevo, California*

*J. H. Worthen, Warwick, Rhode Island*

*J. K. Emery, Weston, Massachusetts*

*R. P. Trowbridge, General Motors Technical Center, Warren, Michigan*

*R. L. Esken, Automation & Measurement Control, The Bendix Corporation, Dayton, Ohio*

*E. E. Lindberg, Hewlett Packard Laboratories, Palo Alto, California*

*J. C. Camhi, Engineering Development Laboratory, E. I. DuPont de Nemours & Company, Wilmington, Delaware*
