**EN ISO 18857-2** 

November 2011

ICS 13.060.50

#### **English Version**

Water quality - Determination of selected alkylphenols - Part 2: Gas chromatographic-mass spectrometric determination of alkylphenols, their ethoxylates and bisphenol A in non-filtered samples following solid-phase extraction and derivatisation (ISO 18857-2:2009)

Qualité de l'eau - Dosage d'alkylphénols sélectionnés -Partie 2: Dosage par chromatographie en phase gazeusespectrométrie de masse d'alkylphénols, de leurs éthoxylates et du bisphénol A dans des échantillons non filtrés après extraction en phase solide et dérivation (ISO 18857-2:2009) Wasserbeschaffenheit - Bestimmung von ausgewählten Alkylphenolen - Teil 2: Gaschromatographischemassenspektrometrische Bestimmung von Alkylphenolen, deren Ethoxylaten und Bisphenol A für nichtfiltrierte Proben unter Verwendung der Festphasenextraktion und Derivatisierung (ISO 18857-2:2009)

This European Standard was approved by CEN on 15 October 2011.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

#### **Foreword**

The text of ISO 18857-2:2009 has been prepared by Technical Committee ISO/TC 147 "Water quality" of the International Organization for Standardization (ISO) and has been taken over as EN ISO 18857-2:2011 by Technical Committee CEN/TC 230 "Water analysis" the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2012, and conflicting national standards shall be withdrawn at the latest by May 2012.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

#### **Endorsement notice**

The text of ISO 18857-2:2009 has been approved by CEN as a EN ISO 18857-2:2011 without any modification.

#### **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 18857-2 was prepared by Technical Committee ISO/TC 147, Water quality, Subcommittee SC 2, Physical, chemical and biochemical methods.

ISO 18857 consists of the following parts, under the general title *Water quality* — *Determination of selected alkylphenols*:

- Part 1: Method for non-filtered samples using liquid-liquid extraction and gas chromatography with mass selective detection
- Part 2: Gas chromatographic-mass spectrometric determination of alkylphenols, their ethoxylates and bisphenol A in non-filtered samples following solid-phase extraction and derivatisation

ISO 18857-2:2009(E)

# Introduction

The user should be aware that particular problems could require the specifications of additional marginal conditions.

This is a free page sample. Access the full version online.

I.S. EN ISO 18857-2:2011

# Water quality — Determination of selected alkylphenols —

### Part 2:

Gas chromatographic-mass spectrometric determination of alkylphenols, their ethoxylates and bisphenol A in non-filtered samples following solid-phase extraction and derivatisation

WARNING — Persons using this part of ISO 18857 should be familiar with normal laboratory practice. This part of ISO 18857 does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user to establish appropriate safety and health practices and to ensure compliance with any national regulatory conditions.

IMPORTANT — It is absolutely essential that tests conducted in accordance with this part of ISO 18857 be carried out by suitably qualified staff.

#### 1 Scope

This part of ISO 18857 specifies a gas chromatographic-mass spectrometric (GC-MS) determination of selected alkylphenols, their ethoxylates and bisphenol A in non-filtered samples of drinking, ground, surface, and waste waters following solid-phase extraction and derivatisation.

The lower limit of the working range depends on the matrix, on the specific compound to be analysed and on the sensitivity of the mass spectrometric detection unit. The method is applicable in a working range from 0,005  $\mu$ g/l to 0,2  $\mu$ g/l for 4-(1,1,3,3-tetramethylbutyl)phenol (OP), and its mono- (OP<sub>1</sub>EO) and diethoxylate (OP<sub>2</sub>EO), from 0,03  $\mu$ g/l to 0,2  $\mu$ g/l for 4-nonylphenol (mixture of isomers) (NP), and its mono- (NP<sub>1</sub>EO) and diethoxylate (NP<sub>2</sub>EO), and from 0,05  $\mu$ g/l to 0,2  $\mu$ g/l for bisphenol A (BPA).

Depending on the matrix, the method is also applicable to waste water in a working range from 0,1  $\mu$ g/l to 50  $\mu$ g/l for OP, OP<sub>1</sub>EO, OP<sub>2</sub>EO and BPA, and from 0,5  $\mu$ g/l to 50  $\mu$ g/l for NP, NP<sub>1</sub>EO and NP<sub>2</sub>EO. The working ranges are based on experimental work carried out in ruggedness testing. Water samples containing suspended matter at concentrations of more than 500 mg/l and waste water samples are extracted by passing a 100 ml sample through the cartridge.
