NORME EUROPÉENNE

EUROPÄISCHE NORM

December 2008

ICS 75.200

English Version

Installation and equipment for liquefied natural gas - Design and testing of marine transfer systems - Part 3: Offshore transfer systems

Installations et équipements de gaz naturel liquéfié -
Conception et essais des systèmes de transfert marins -
Partie 3: Systèmes de transfert offshore

Anlagen und Ausrüstung für Flüssigerdgas - Auslegung und
Prüfung von Schiffsübergabesystemen - Teil 3: Offshore-
Übergabesysteme

This European Standard was approved by CEN on 1 November 2008.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword.....	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Definition and ability of the LNG transfer systems	7
4.1 System requirement	7
4.2 Overall safety philosophy	7
4.3 Overall functional targets and requirements	8
4.4 Design principles and risk assessment methodology.....	8
4.5 Design principles	9
4.6 Risk assessment.....	10
4.6.1 Hazard identification	10
4.6.2 Risk analysis	11
4.6.3 Risk assessment.....	11
4.6.4 Acceptance criteria.....	12
4.7 Safety-critical elements.....	12
4.8 Performance standards.....	12
4.9 Risk reduction	12
5 New design qualification.....	13
5.1 Design qualification.....	13
5.2 Technology assessment	14
5.3 Risk assessment: failure mode identification	14
5.4 Analysis and testing.....	14
5.5 Reliability analysis.....	16
5.6 Compliance statements	16
6 Design basis and criteria of a LNG transfer system	16
6.1 General.....	16
6.2 Supporting structures and equipment	17
6.3 Transfer line diameter and product data.....	17
6.4 Dimensions and clearances	17
6.5 Stress analysis.....	18
6.6 Dynamic behaviour (cyclic motions amplitude, speed and fatigue)	18
6.7 Special loads situations.....	18
6.8 Product swivel joints and structural bearings.....	19
6.9 Connecting/disconnecting device	19
6.10 Handling for connection, disconnection, storing.....	19
6.11 Communications, evacuation and rescue.....	19
6.12 Others	20
7 Safety precautions.....	21
7.1 Introduction	21
7.2 Communication.....	21
7.3 Approach and control monitoring berthing and connection process	21
7.4 Position monitoring, alarm and shut down system for the LNG transfer systems	22
7.5 ERS system	22
7.6 Safety interfaces	22
7.7 Control of fluid transfer.....	23
8 Connection with the LNGC	23
8.1 Two main categories of LNG transfer systems are anticipated:	23

8.2	Additional requirements for the ship shall address:	23
8.3	In order to maximise the level of standardisation the following guidance shall be observed:	24
8.4	Systems and equipment for the position control of the LNG carrier during berthing, connection and transfer:	24
9	Operating and control design	24
10	Inspection and tests	24
11	Quality assurance and control	24
12	Documentation	24
Annex A (normative) Procedure for deviation from the full standard		26
Bibliography		27

Foreword

This document (EN 1474-3:2008) has been prepared by Technical Committee CEN/TC 282 “Installation and equipment for LNG”, the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2009, and conflicting national standards shall be withdrawn at the latest by June 2009.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This European Standard consists in 3 parts:

EN 1474-1: *Installation and equipment for liquefied natural gas — Design and testing of marine transfer systems — Part 1: Design and testing of transfer arms*

EN 1474-2: *Installation and equipment for liquefied natural gas — Design and testing of marine transfer systems — Part 2: Design and testing of transfer hoses*

EN 1474-3, *Installation and equipment for liquefied natural gas — Design and testing of marine transfer systems — Part 3: Offshore transfer systems*

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
